

# Professional Services for VMware Cloud Foundation Operational Readiness Assessment

Successfully deploy, operate, and optimize your new environment

## At a glance

Expertise in evaluating, planning, and executing a new cloud operating model.

## Key benefits

- Realize the full potential of your new VMware Cloud Foundation environment
- Identify current state gaps and weaknesses
- Address risk and operation complexities
- Receive a roadmap for success

VMware Cloud Foundation is the hybrid cloud platform IT leaders use to enable secure, consistent infrastructure and operational excellence. As you prepare for your new environment, it's necessary to plan how to achieve operational readiness rapidly.

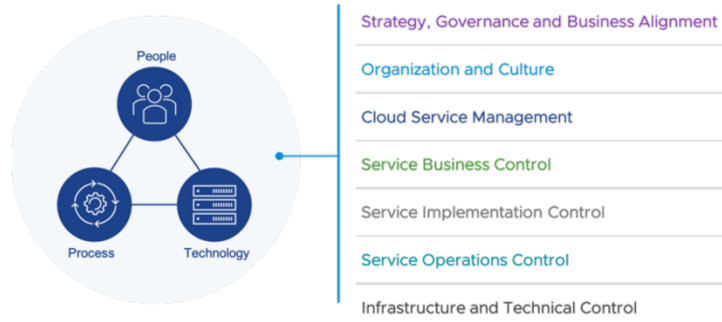

It's critical to identify the gaps in your current environment and prioritize required actions to ensure you deliver success for your business with a future-ready architecture.

VMware's Professional Services team has the product knowledge and implementation expertise our customers turn to for help to prepare to deploy and manage VMware Cloud Foundation.

## Service overview

The VMware Cloud Foundation Operational Readiness Assessment is a structured, comprehensive review of your existing environment, capabilities, and processes. As part of the engagement, we deliver a prioritized list of the obstacles in realizing success.

Technology is only part of our assessment. We help our customers with a thorough evaluation across your organization to uncover hidden challenges.

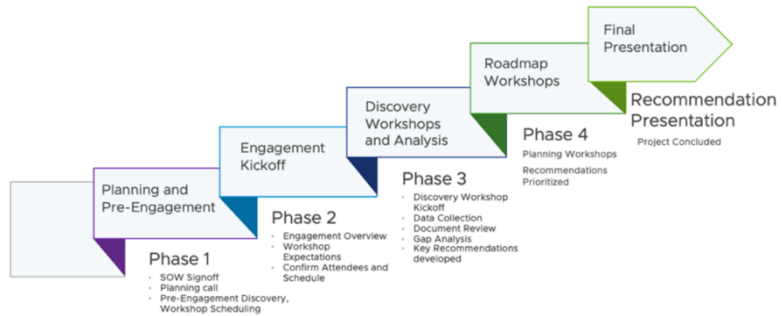

## Learn more

## Engagement at-a-Glance

A broad evaluation uncovers hidden barriers, highlights operational excellence, and provides you with identified gaps and the prioritized recommended actions to take.

## Deliverables

This Professional Services engagement provides you with the knowledge, tools, and plans to support your accelerated virtualization.

- Operational Readiness for VMware Cloud Foundation Assessment Report: Detailed report that describes and scores gaps and misalignments with VMware best practices
- Operational Readiness for VMware Cloud Foundation Recommendations Presentation: Prioritized recommendations and next steps to successfully operationalize VMware Cloud Foundation

## Benefits

Moving to a new cloud model is less stressful and time-consuming if you've got a partner whose knowledge is deep, and experience is broad. VMware Professional Services delivers unique value in planning and executing VMware-related projects.

We know the challenges of building a predictable, stable platform because we've helped many VMware customers. Our methodology is comprehensive and looks at more than technology. With VMware Professional Services, you get a partner who can help you in every aspect of building your VMware Cloud Foundation.

- Understand the shifting requirements of your new platform
- Identify your current state gaps and weaknesses
- Establish the required criteria for operational readiness
- Develop a detailed roadmap to achieve desired results
- Prioritize critical activities and tasks
