

VMware Cloud Foundation Services and Lifecycle Support Overview

Fast path to cloud

At a glance

Quickly adopt and consume your VMware Cloud Foundation environment with a variety of services to help you wherever you are in your cloud journey.

Key benefits

- Reduce risk and complexity when implementing new technologies
- Minimize disruption to existing operations
- Benefit from our best practices, proven methodologies, and deep knowledge of VMware technology
- Augment your in-house skills with extended experts, and training

It's important to be agile and move as quickly as possible. So how do you overcome obstacles and maximize the value of your VMware Cloud Foundation™ investments? Leverage experts who know your industry and know the technology. They can help you achieve your goals faster than you can do it alone.

Service overview

Our experts can help you with consulting services, operational services, and training. We can architect, deploy, configure, integrate, and operationalize VMware Cloud Foundation and build your private cloud.

VMware Pro Cloud Services

VMware Pro Cloud Services™ can help you achieve the benefits from your private cloud faster and with less risk. Our services provide consistent, predictable, and reliable solutions by using prescriptive reference architectures developed from years of experience and best practices.

A cross functional team of VCF experts brings together the right skills at the right time for a coordinated effort focused on helping you achieve your objectives. Our flexible delivery model is based on a standard approach for consistency and repeatability. We provide operational assistance for integrating with your existing and third-party solutions. To help you run and manage your VCF environment at scale, we help you define a new cloud operating model.

We offer a broad range of Pro Cloud Services to support your strategic IT initiatives.

- Build a new private cloud
- Build a new Federal cloud
- Modernize an existing environment
- Provide an IT self-service catalog
- Extend a data center into the cloud

- Implement a private AI foundation
- Migrate business-critical workloads
- Implement DR and ransomware protection and recovery

Extended Expert Services

Extended Expert Services help you optimize operations with hands-on assistance, either remotely or onsite. Our consultants enhance and support your operations team, implementing tasks tailored to your organization's needs and unique objectives. They can assist with product installation, usage, optimization, and administration, bridging any potential staffing gaps.

Learning

With any new technology, knowledge gaps can exist. We offer a range of training that can advance and augment your in-house skills. Leveraging these services not only gets your teams ready for the future, it shows an investment in them and their future. Training options include:

- Digital Training – Online training entitlement that includes on-demand content spanning the entire VMware cloud stack free of charge to all VMware Cloud Foundation customers
- Classroom - Traditional instructor-led VMware training in a classroom setting.
- Live Online - Instructor-led training delivered online that lets you learn from virtually anywhere.
- Private Training - Training at your location tailored to fit your business goals, schedule, and delivery needs.

Benefits

Our teams have the experience, best practices, proven methodologies, and deep knowledge of VMware technology that can help you reduce risk and complexity and minimize disruption. From developing your strategy and roadmap, to architecting, deploying, and integrating your environment, to implementing operations and management, we can help you realize your goals faster.
