

# VMware Cloud Foundation™ Jumpstart Workshops

## Accelerating cloud success

### At a glance

VMware Cloud Foundation (VCF) Jumpstart Workshops help customers get the most value from the full VCF product stack.

To learn if your organization is eligible for a workshop and about possible restrictions and limitations, contact your account representative.

### Key benefits

- Gain clarity of current VCF technology state
- Increase service delivery efficiencies
- Maximize your VCF investment value
- Ensure alignment with VMware best practices

VMware Cloud Foundation (VCF) is a multi-cloud platform that provides a full-stack hyperconverged infrastructure (HCI) that helps organizations modernize data centers and deploy modern container-based applications. To get the most out of this platform, VCF Jumpstart Workshops help customers understand VMware's recommended best practices for cloud maturity and provide a tailored implementation and adoption plan to achieve their goals.

### Service overview

Depending on the specific needs of your organization, VCF Jumpstart Workshops utilize one workshop to best align with your current technical and business use cases. Activities may include the following.

#### Cloud Maturity Rating

Assess current capabilities against desired private cloud future state, analyze cloud use cases, prioritize cloud capabilities, and define phases and milestones for delivery.

#### Implementation Architecture

Analyze current architecture for VCF reference architecture best practices, discuss architecture gaps and compose a conceptual architecture to match desired cloud use cases, and review VMware Validated Solutions (VVS) in the customer environment to evaluate for high-level architectural best practices to align to the desired future state and capabilities.

#### Adoption Plan

Document adoption plan for cloud use cases and recommend backlog items based on Cloud Operating Model areas.

#### Pro Cloud Services Backlog Items

Develop actionable recommendations for continued services in the form of backlog items aligned to the Pro Cloud Services catalog.
