

Operator Learning Subscription for VMware Tanzu

At a glance

Efficiently train your infrastructure and DevOps teams on key concepts to build and operate secure, multi-cloud container infrastructures with VMware Tanzu products.

Key benefits

- Tanzu solution-specific content created by VMware experts
- This subscription prepares the student for the VMware vSphere with Tanzu Certification exam
- Convenient, immediate access to the desired digital learning 24x7 from anywhere
- No additional charge for new Tanzu Operator content added throughout your subscription term
- Your subscription includes at least 1 certification voucher

With the accelerated pace of innovation, organizations are rapidly adopting cloud native technologies and need to efficiently train development teams. Targeted learning helps you build valuable skills and technical mastery and use them to achieve better business outcomes. Getting access to the right content at the right level of expertise at the right time provides added support for your VMware Tanzu solutions.

Learning Subscription Overview

Keeping up with rapid change is a challenge for most large organizations today. The Operator Learning Subscription for VMware Tanzu is a comprehensive digital learning solution designed to provide your operations team the training needed to manage your Tanzu products at scale in production environments. It includes our entire library of training on both the Tanzu Application Server as well as the Tanzu Kubernetes offerings.

[The subscription includes the following On Demand classes, and it will be updated with the latest operator focused courses as they become available](#)

- VMware vSphere with Tanzu: Deploy & Manage v7.0 - On Demand
- VMware Tanzu Kubernetes Grid: Install, Configure, Manage v1.3 - On Demand
- VMware Tanzu Mission Control: Management & Operations 2020 - On Demand
- Kubernetes Foundations & Cluster Operations - On Demand
- VMware Tanzu Application Service: Install, Configure, Manage - On Demand
- VMware Tanzu RabbitMQ: Install, Configure, Manage - On Demand

Our On Demand courses are based on the same in-depth instruction and content as the instructor-led courses offered by VMware Learning and qualifying courses to meet eligibility requirements for relevant certifications.

Job-Ready Practical Skills

The content in the Operator Learning Subscription for VMware Tanzu covers the latest industry and VMware Tanzu and modern application technologies. Whether you have operators and application owners who provision and manage Kubernetes clusters or system administrators and system integrators responsible for designing and implementing vSphere with Tanzu, you will have the skills necessary to scale your organization's cloud platform.

Students will learn these skills through a combination of lecture and labs, with a balanced curriculum that covers both technology and job role-specific skills to prepare students to create scalable and reliable applications.

Unlock the full potential of Tanzu

Designed for customers who have invested in Tanzu, this subscription will enable your operations teams to manage the platform at scale. Essential skills to be successful in using the Tanzu products will be covered as well as preparing learners for the Tanzu certification exam.

As technology needs evolve, our content will be continuously updated. You will receive these changes automatically to ensure your team is up skilled with the latest training. Any new Tanzu Operator content added throughout your subscription term will also be made available at no charge.

Benefits

The content in the Operator Learning Subscription for VMware Tanzu will help developer and DevOps teams to:

- Efficiently deploy applications anywhere without worrying about underlying infrastructure
- Boost application performance and resiliency
- Streamline development efforts
- Eliminate unnecessary infrastructure silos
- Enforce security, networking and compliance requirements
