

VMware Customer Connect Learning™ Premium Subscription

Your single source for digital training from VMware

AT A GLANCE

Take your skills to the next level

KEY BENEFITS

- Single source for VMware products and skills development
- Always-on, always available during the annual subscription term
- supplement to VMware instructor-led training
- Gain knowledge at your own pace
- Great starting point to advance your skills and career

Get started on your VMware Learning journey by contacting one of our [Learning Specialists](#).

Accelerate your skills anytime, anywhere

VMware can help you thrive in your career journey—professionally and personally. We believe that access to world-class knowledge, when and where you want it, is critical to your long-term success. The VMware Customer Connect Learning premium subscription is purpose-built for individuals who require online 24/7 access to the latest “how-to” videos, product insights and VMware Certification exam preparation. Think of Connect Learning premium subscription as your single source for digital training when you have a question about a VMware product or want to build skills for the next step in your career journey.

As an individual member of Connect Learning premium subscription, you will have 24-hour, 365-day access to our centralized learning platform. Each Connect Learning premium subscription offers:

- More than 60 VMware e-learning modules
- Over 1,500 short form “how-to” videos spanning all VMware solutions
- Hundreds of VMware Certification exam preparation videos to help you achieve:
 - VMware Certified Professional (VCP)
 - VMware Certified Advanced Professional (VCAP)

Customers requiring access to additional resources including VMware on-demand courses or associated Hands-on Labs must subscribe to a VMware Customer Connect Learning Enterprise Learning Subscription. Contact your [Learning Specialist](#) to learn which option is right for you or your team.

VMware e-learning modules

VMware e-learning modules are narrated video sessions featuring content that spans the following VMware technologies:

- Software-Defined Data Center (SDDC)
- Multi-Cloud
- Cloud Networking and Security
- Digital Workspace
- App Modernization

Each lesson presents a series of sequential modules that you can complete on your schedule. Complete any or all available VMware e-learning modules as many times as desired throughout your Connect Learning premium subscription term.

VALUE-ADDED FEATURES:

- New content added weekly
- Receive complimentary invitations to our Live Instructor Hours as scheduled
- Get notified of special VMware Instructor-Led training offers and live webinars

Select from different skill levels per e-learning module from *Beginner*, *Intermediate* to *Advanced* with further selections available by job role. See sample modules in Figure 1.

Guided, short-form VMware solution videos

We recognize that you may not have time to sit through in-depth instructional lesson plans. Sometimes, you just want to know a specific implementation step or task.

We have created “how-to” videos to help you troubleshoot and resolve common tasks. These videos average 15 minutes in length. Get the information you need now to help you complete a project. Figure 2 presents a few examples of our short-form instructional video library.

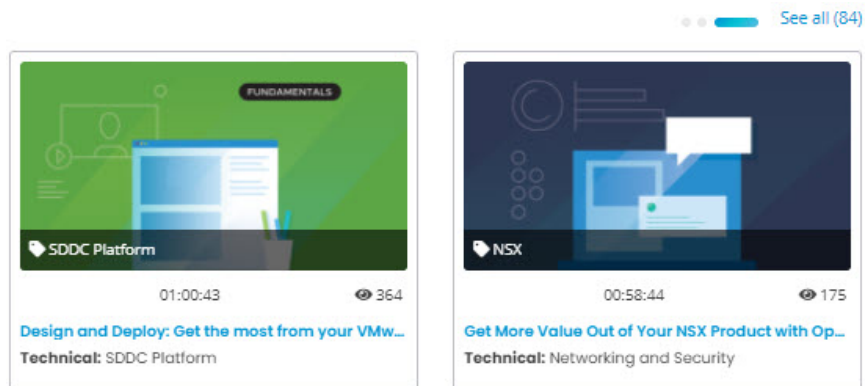

FIGURE 2: Featured “How-To” Videos, available on Connect Learning premium subscription

Certification exam preparation videos

VMware Certifications represent a validation of your skills and recognition of excellence. Each Certification exam preparation video in your Connect Learning premium subscription reviews each exam objective and the blueprint to understanding the skills assessed. These videos do not focus on teaching you how, but instead provide you with the best possible guidance to make sure you're ready to pass the exam.

We guide you with supporting documentation, walk through network design guides, highlight helpful resources, and suggest additional content in our library to advance your learning. The focus is on the exam topics that you will most likely be presented. This is a great way to help you identify any knowledge gaps and get the answers.
