

Virtual Technical Account Management Services

Accelerate solution time to value

AT A GLANCE

Virtual Technical Account Management Services provide your organization with a VMware subject matter expert, advocate and advisor who will:

- Document your virtual infrastructure
- Analyze your environment and recommend a Technical Improvement Plan (TIP) to help you focus on a targeted course of action
- Address technical concerns that are impacting day-to-day operational efficiency
- Work with you to implement best practices that increase your operational stability and help prevent future problems

KEY BENEFITS

- Focused on achieving your IT outcomes
- Helps you transition your IT operations from reactive to proactive
- Supports your team in maintaining a stable, operationally efficient VMware environment
- Enables smooth transitions to new VMware technologies

FORRESTER TOTAL IMPACT™ STUDY

Learn more about both quantitative and qualitative benefits in the [Forrester Total Economic Impact™ Study](#) that examines the financial impact of VMware Technical Account Management Services across multiple organizations.

Business Challenge

Business stakeholders are challenging IT organizations to identify, utilize and prove how technology is helping them drive business outcomes. IT organizations are being driven to move away from operating in a reactive mode and focus on strategic projects that propel the business forward. That's why you have invested in VMware technology – to help you innovate faster, reduce costs and gain efficiencies. Your organization must determine the best way to accelerate VMware solution time to value and optimize current and future technologies, while reducing risk and cost.

Service overview

VMware Virtual Technical Account Management Services (VTAM) are designed to provide smaller IT organizations with a go-to VMware expert who helps ensure that your VMware investments deliver ongoing value.

What You Get

Your VTAM Services are focused on you and helping you achieve your objectives. We will:

- Start your engagement by studying and documenting your IT environment and visit you onsite
- Stay aligned through bi-weekly, web-based meetings
- Help you gain access to vLink which is a secure place to collaborate with your VTAM on important projects and issues, share files and get up-to-the-minute news and alerts
- Instantly engage and interact with you and other members of the VTAM community
- Get answers to your advanced technical questions before a break/fix event occurs
- Reduce your risk before production environments go live with upgrade plan reviews
- Target a strategic path for deploying new software, upgrading existing infrastructure or improving your environments stability and operations
 - Implement: navigate the planning and requirements for ensuring a successful software deployment
 - Increment: provide guidance for getting your infrastructure current
 - Improve: optimize and stabilize deployed software
- Periodic check-ins ensure that you are getting the most from your VTAM Services and impact reports showcase your results to key stakeholders
