

Cloud Automation— Faster, Simpler, Smarter

WHEN YOU COMBINE VMWARE SOFTWARE WITH PROFESSIONAL SERVICES

Get IT service delivery unstuck

Symptoms that you need cloud automation:

Days or weeks
to provision
infrastructure
or applications

Manual, one-off
provisioning
processes

No best practices
or security/
compliance guidance

Increase
in shadow IT

Give customers the infrastructure and applications they need, right away.

With VMware
vRealize™
Automation™
provisioning
is easy:

1

**Log in to the
self-service
portal** (from any
web browser!)

2

**Request an
application or
resource** (with a
couple of clicks)

3

**Receive it
in minutes**
(not weeks)

Now IT can deliver:

- A personalized self-service experience: one catalog, custom services
- Multi-vendor, hybrid cloud infrastructure at the push of a button
- Streamlined application assembly using a drag-and-drop interface
- Simplified, automated application release
- Adaptable, extensible automation—automate the delivery of any IT service

AMPLIFY ROI WITH VMWARE PROFESSIONAL SERVICES

Compound the benefits, get to great results faster
