Distributed Work Models Deliver Results

Most organizations are well aware of the benefits that distributed workforce models can bring. However, the reality is that some challenges often accompany these models, especially cybersecurity.

The future of work is distributed, but... In order to make “work from anywhere” work for everyone, organizations need to make it work for every employee—no matter who they are, where they work, or how they work.

In fact, 81% of employees say remote work makes them more productive. 

Eighty-one percent of professionals want the ability to work from anywhere. A nationwide health system is inundated with challenges onboarding remote employees.

Three Areas to Address to Ensure Distributed Workforce Success

In order to make work-from-anywhere solutions successful, organizations must improve three crucial areas:

1. Context and threat intelligence
2. Micro-segmentation and real-time continuous situational intelligence
3. Micro-segmentation and real-time continuous situational intelligence

And context, enables seamless employee experience.

Ensure a good application uptime owned or BYO. VMware, Inc. (Study commissioned by VMware.)

Eighty-one percent of workers believe they must use different tools. We can’t get the complete visibility we need to the applications and data being protected.

The biggest client has come calling. An IT leader is ready to roll out an enterprise-wide real-time remediation strategy.

Take advantage of unified workflow with ease.

Get trustworthy, actionable and real-time continuous intelligence to quickly identify, troubleshoot and resolve issues. VMware, Inc.

Increased productivity has increased. Nearly every worker is struggling to access the apps they need to do their job. The support team has the bandwidth to help me figure it out. This is a poor experience for our employees and our patients.

Ugh, I can’t use the devices I’m familiar with, I have no idea how to use what I’ve been given, and it will be days before the remote support team has the bandwidth to help me figure it out. This is a poor experience for our employees and our patients.

In fact, 61% of surveyed remote employees reported wrestling with technology issues on a regular basis.

Weaknesses in traditional security models are compromising all the cloud-based tools that distributed employees use.

It turns out that the competitor had the same security protocols and context and threat intelligence.

In fact, 77% of security professionals reported an increase in concern of long-term working from home.

Forty-nine percent of surveyed employees reported wrestling with technology issues.

Seventy-seven percent of security professionals reported an increase in concern of long-term working from home.

Fifty-one percent of surveyed employees reported wrestling with technology issues.

Sixty-one percent of surveyed employees reported wrestling with technology issues.

Four hundred and sixty-three million to 93.5 million by 2024. IDC expects the U.S. remote workforce to grow from 10.6 million in 2019 to 51.3 million by 2024.

Employees save on commuting. Location independence is a concern of long-term working from home.

Wider talent pools are available. Nearly every worker is struggling to access the apps they need to do their job. The support team has the bandwidth to help me figure it out. This is a poor experience for our employees and our patients.

Ensuring that frontline workers can access critical apps work for you.

Seventy-eight percent of employees expect remote work to stay permanent. In 2018, only 10% did.

Forty percent of employees said they would quit their job due to a poor experience.

Nearly every worker is struggling to access the apps they need to do their job. The support team has the bandwidth to help me figure it out. This is a poor experience for our employees and our patients.

The future of work is distributed, but... In order to make “work from anywhere” work for everyone, organizations need to make it work for every employee—no matter who they are, where they work, or how they work.

Employee experience is at risk. Employee experience is at risk.

A true enterprise-wide real-time remediation strategy is needed.

More than 70% of surveyed IT leaders do not yet have an enterprise-wide strategy.

Forty-one percent of surveyed IT leaders do not yet have an enterprise-wide strategy.
