A VMware task force consisting of vExperts, VMUG leaders, CTO Ambassadors, VMware Skyline Experts, and other Subject Matter Experts was assembled on May 1, 2020 to host free Skyline workshops remotely for any VMware customer in need during the global COVID-19 crisis, and beyond. Skyline helps keep you out of harm's way by reducing downtime and mitigating security vulnerabilities in your VMware data centers.

Our mission: quickly engage with customers and enable them to prevent outages without spending a single dollar.

Auto-schedule a free Skyline workshop with a VMware expert
→ <https://calendly.com/skyline-covid19-taskforce/skyline-workshop>

The Task Force will provide free Skyline workshops via Zoom to:

- **Customers not yet using Skyline** - we will help install Skyline and ensure you understand how to benefit from this service, including how to remediate findings.
- **Customers already using Skyline** - we will explore the full functionality of Skyline with you to ensure you're getting maximum value from the service.

Hospitals and essential healthcare customers will be given priority.

Please email skylinecovid19taskforce@vmware.com for assistance or to request scheduling a workshop using your own meeting tools.

This free workshop is intended for VMware customers of any size to utilize Skyline as part of their existing Production or Premier Support agreements. Customers on Basic Support may still register for the workshop to receive more information on Skyline and proactive guidance to prevent outages.
