Disaster Recovery
Any Way You Want It

People like you told Forrester their
No. 1 IT priority

---

Reasons why preparing for disaster is a must

- 43% of companies that experience disaster never reopen.
- 23% say failure to recover data would be "disastrous".

Typically, they manage more than 100 servers, desktops and laptops producing 40TB of new data every year.

Now, you can get disaster recovery (DR) solutions that are simple to implement and manage and cost-effective to procure and operate.

Reasons why cloud-based Disaster Recovery is better

- Cost Effective
- Simple to manage, no manual intervention
- Reliable
- Frequently tested without disruption

Discover the flexible, cost-effective way to great protection for your business-critical information. Download our trend brief – Disaster Recovery: Any Way You Want It.
