

VMware Partner Mobile Knowledge Portal

AT A GLANCE

The VMware Partner Mobile Knowledge Portal (PMKP) is VMware's first native, tablet-based application that provides content and accreditation training exclusively for VMware partners. The secure portal requires login using your existing VMware Partner Central credentials and is available for both iOS and Android platforms. The application provides online and offline access to VMware solution training, including how to identify opportunities, close deals, and architect and deploy solutions. Using the PMKP, you're able to learn where, when and how you want to.

VMware Mobile Knowledge Application Icon

Overview

With mobile-optimized training, VMware is making it easier than ever for partners to be successful selling, designing, deploying and supporting VMware solutions. Leverage the VMware Partner Mobile Knowledge Portal (PMKP) to access content on your iOS or Android tablet device and conveniently stay up-to-date on product training, sales and technical accreditations, or the latest solution enhancements.

To simplify content search, the training is categorized by VMware Solution Competency:

- Business Continuity
- Cloud Infrastructure as a Service
- Desktop Virtualization
- Hybrid Cloud
- Infrastructure Virtualization
- Management
- Virtualization of Business-Critical Applications

Each solution area is shows the competency name, the products that align to that solution and the associated accreditation badge (See figures 1 and 2).

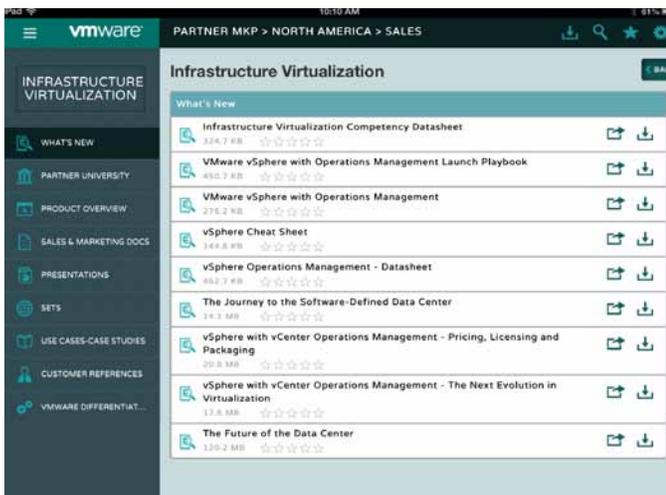

Figure 1 - Training Categorized by Solution Competency

Figure 2 - Example Solution Area Tile

By leveraging a native mobile application rather than a tablet-based web browser, you have the ability to not only view, but also download content to your device. Take advantage of this capability for offline viewing at your convenience when you may be without internet access, such as a plane flight.

Whether you view the training content online or download, you still must visit Partner University to complete any tests associated with the training to earn credit, including sales or technical accreditations.

Partner Network Datasheet

How to Access

Once you download the application, a message will guide you to click on the “gear” icon in the upper right corner to access partner content. From there, you can get started in three easy steps (See figure 3):

1. Select “Partner” from the drop-down menu
2. From the dialog box, select your location and role
3. Then sign-in with you existing Partner Central credentials

Figure 3 - Accessing the PMKP

Once you're logged in, you'll be accessing the PMKP on the main partner page where you can select content from any of VMware's solution areas.

Download Your App Today:

Content Security

The PMKP is a secure partner site within the public application and requires login using VMware Partner Central account credentials. If you need to create a Partner Central account, [click here](#).

If content has been downloaded from the application to a mobile device, an additional security feature requires reconnection to the PMKP every four weeks to maintain the offline content. If you do not reconnect after four weeks the existing offline content on the device is destroyed per VMware security policy. You will be able to log back into the PMKP to reload any content that may have been removed due to this policy.

Visit Partner University to Get Training Credit

While the PMKP allows for mobile and offline content access, don't miss the opportunity to get credit for your training. Most accreditations and certifications require some completion. After taking mobile training, you must login to VMware's Partner University to complete any final requirements, such as leveraging the course test-out option, in order to earn your accreditation/badge.
