

SUPPORT FOR CUSTOMERS RUNNING SAP ON VMWARE

Operating Environments

SAP supports all of its applications running in both Linux and Windows production environments on VMware virtual machines.

Operating Environment	Development & Test	Production
Windows 2000	X	X
Windows 2003 Server	X	X
Red Hat Enterprise Linux	X	X

VMware Virtualization Competency Center

The VMware Virtualization Competency Center in Walldorf, Germany is available for customers who want to kick the tires and see a virtualized SAP infrastructure in action. The competency center provides services and consulting to aid customers who want to deploy their SAP software in a virtualized environment. The VVCC can help you with:

- Demos and sales presentations
- Training and seminars
- Proof of concepts (POC's)
- Prototyping sand box environment
- Development of SAP on VMware solutions

Qualified Hardware

These systems are certified by SAP as approved platforms for SAP applications running in VMware Infrastructure virtual machines:
