

Course Catalog

October–December 2022

Table of contents

App Modernization

Kubernetes Fundamentals and Cluster Operations	4
Spring: Core Training	4
Spring Boot: Developer	4
Spring Security	5
VMware Tanzu Kubernetes Grid: Install, Configure, Manage [V1.3]	5
VMware Tanzu Kubernetes Grid Integrated Edition: Install, Configure, Manage [V1.10].....	5
VMware Tanzu Mission Control: Management and Operations 2022	5

Multi-Cloud

Data Center Automation with vRealize Orchestrator and vSphere PowerCLI.....	6
VMware Cloud Foundation: Planning, Management, Operations [V4.3]	6
VMware Cloud on AWS: Deploy, Configure, Manage 2021	6
VMware Data Center Virtualization: Core Technical Skills	6
VMware HCX: Management and Operations	7
VMware Integrated OpenStack: Install, Configure, Manage [V7]	7
VMware vSAN: Fast Track [V7]	7
VMware vSAN: Install, Configure, Manage [V7].....	8
VMware vSAN: Management and Operations [V7].....	8
VMware vSAN: Plan and Deploy [V7]	8
VMware vSAN: Troubleshooting [V7]	8
NEW VMware vSphere: Install, Configure, Manage [V8]	9
NEW VMware vSphere: Operate, Scale and Secure [V8]	9
VMware vSphere with VMware Tanzu: Deploy and Manage [V7]	9
VMware vSphere: What's New [V6.7 to V7]	9
VMware vSphere: Install, Configure, Manage [V7]	10
VMware vSphere: Optimize and Scale [V7]	10
VMware vSphere: Optimize and Scale plus Troubleshooting Fast Track [V7]	10
VMware vSphere: Troubleshooting [V7]	10
VMware vSphere: Fast Track [V7]	11
VMware vSphere: Design [V7]	11
VMware vSphere: Advanced Administration Workshop [V7]	11
VMware vRealize Automation: Orchestration and Extensibility [V8.6]	12
VMware vRealize Automation: Troubleshooting [V8.6]	12
VMware vRealize Automation: Install, Configure, Manage [V8.3].....	12
VMware vRealize Automation: Advanced Features and Troubleshooting [V8.x]	12
VMware vRealize Automation SaltStack Config: Deploy and Manage [V8.4].....	13
VMware vRealize Automation SaltStack SecOps: Deploy and Manage [V8.6].....	13
VMware vRealize Log Insight: Deploy and Manage [V8.4].....	13
NEW VMware vRealize Operations: Install, Configure, Manage [V8.6]	13
VMware vRealize Operations: Advanced Use Cases [V8.x].....	14
Troubleshooting VMware vRealize Operations [V8.x]	14
NEW VMware vRealize Operations: Install, Configure, Manage [V8]	14
NEW VMware vRealize Operations for Operators [V8.6].....	14

VMware vRealize Suite Lifecycle Manager: Install, Configure, Manage [V8.0]	15
VMware Site Recovery Manager: Install, Configure, Manage [V8.2]	15
VMware Cloud Director: Install, Configure, Manage [V10.3]	15
VMware Cloud Director: Advanced Networking with NSX-T Data Center [V10.2]	16
VMware Cloud Director: Advanced Workshop [V10.2].....	16
VMware Cloud Director: Install, Configure, Manage [V10.1].....	16
VMware vCloud Director: Tenant Operations [V10.x]	16

Virtual Cloud Network

Migration from VMware NSX for vSphere to NSX-T	17
VMware NSX-T Data Center: Design [V3.2]	17
VMware NSX-T Data Center: Install, Configure, Manage [V3.2]	17
VMware NSX-T Data Center: Troubleshooting and Operations [V3.2].....	18
VMware NSX-T Data Center: What's New [V3.2].....	18
VMware NSX-T Data Center for Intrinsic Security [V3.2]	18
VMware NSX-T Data Center for Intrinsic Security [V3.1].....	18
VMware NSX-T Data Center: Multisite Deployments with Federation	19
VMware NSX-T Data Center: Migration from NSX Data Center for vSphere	19
VMware Introduction to Application Delivery Controller with NSX Advanced Load Balancer	19
VMware NSX Advanced Load Balancer: Install, Configure, Manage [V20.x].....	19
VMware NSX Advanced Load Balancer: Global Server Load Balancing Design and Deploy	20
VMware NSX Advanced Load Balancer: Infrastructure and Application Automation	20
VMware NSX Advanced Load Balancer: Install, Configure, Manage plus Troubleshooting and Operations Fast Track	20
VMware NSX Advanced Load Balancer: Web Application Firewall Security	21
VMware SD-WAN: Deploy and Manage [V4.x].....	21
VMware SD-WAN for Service Providers [V4.x].....	21
VMware SD-WAN: Design and Deploy [V3.x]	21
VMware Telco Cloud Automation: Install, Configure, Manage [V1.8]	22
VMware Telco Cloud Infrastructure: Install, Configure, Manage [V2.0].....	22
VMware Telco Cloud Platform: Install, Configure, Manage [V2.0]	23
VMware Telco Cloud Platform – RAN: Install, Configure, Manage [V1.5].....	23
VMware Telco Cloud Service Assurance: Install, Configure, Manage [V2.0]	23
VMware vRealize Network Insight: Install, Configure, Manage [V6.1].....	24

Anywhere Workspace

VMware App Volumes and Dynamic Environment Manager	25
VMware End-User Computing: Design	25
VMware Horizon 8: Skills for Virtual Desktop Management	25
VMware Horizon 8: Infrastructure Administration	26
VMware Horizon 8: Infrastructure Troubleshooting.....	26
VMware Horizon 8: Infrastructure Administration and Troubleshooting	26
VMware Horizon 8: Troubleshooting Bootcamp	26

Table of contents (continued)

VMware Horizon 8: Deploy and Manage	27
VMware Horizon 8: Virtual Desktop Bootcamp.....	27
VMware Horizon 8: Virtual Desktop Troubleshooting	27
VMware Horizon 8: Deploy and Manage plus App Volumes Fast Track	27
VMware Horizon Cloud Service: Deploy and Manage on Microsoft Azure	28
NEW VMware Workspace ONE: Deploy and Manage [V22.x].....	28
NEW VMware Workspace ONE: Deploy and Manage plus UEM Troubleshooting Fast Track [V22.x]	29
NEW VMware Workspace ONE: Integrations [V22.x]	29
NEW VMware Workspace ONE: Skills for UEM [V22.x].....	29
NEW VMware Workspace ONE: UEM Bootcamp [V22.x]	30
NEW VMware Workspace ONE: UEM Troubleshooting [V22.x]	30
VMware Workspace ONE: Advanced Integration [V21.x].....	30
VMware Workspace ONE: Deploy and Manage [V21.x].....	30
VMware Workspace ONE: Deploy and Manage plus UEM Troubleshooting Fast Track [V21.x].....	31
VMware Workspace ONE: Integrating Access with UEM [V21.x]	31
VMware Workspace ONE: Modern Management for Windows 10 [V21.x]	31
VMware Workspace ONE: Skills for UEM [V21.x]	32
VMware Workspace ONE: Skills for UEM and Modern Management for Windows 10 [V21.x]	32
VMware Workspace ONE: UEM Bootcamp [V21.x]	32
VMware Workspace ONE: UEM Troubleshooting [V21.x]	32

Security

VMware Carbon Black App Control Administrator	33
VMware Carbon Black App Control Advanced Administrator.....	33
VMware Carbon Black Cloud: Advanced Operations and Troubleshooting ..	33
VMware Carbon Black Cloud: Plan and Deploy	34
VMware Carbon Black Cloud Audit and Remediation.....	34
VMware Carbon Black Cloud Endpoint Standard	34
VMware Carbon Black Cloud Enterprise EDR	34
VMware Carbon Black EDR Administrator.....	35
VMware Carbon Black EDR Advanced Administrator	35
VMware Carbon Black EDR Advanced Analyst	35
VMware Carbon Black Portfolio: Configure and Manage	36

App Modernization

Modernize application development to accelerate digital innovation.

You have hundreds or even thousands of applications—both existing monoliths and new cloud native microservices. They're all different and all critical to your business. Leverage VMware technologies that enable you to build, run and manage all your applications across any cloud.

Kubernetes Fundamentals and Cluster Operations

This four-day course is the first step in learning about containers and Kubernetes fundamentals and cluster operations. Through a series of lectures and lab exercises, the fundamental concepts of containers and Kubernetes are presented and put to practice by containerizing and deploying a two-tier application into Kubernetes.

Delivery Types	Classroom, Live Online, vFlex, Private Training
Role	System Operator, System Administrator, System Integrator
Level	Professional
Length	4 Days

[Register](#) now.

Take the [English On Demand](#) self-paced course.

Spring: Core Training

This four-day course offers hands-on experience with the major features of Spring and Spring Boot, which includes configuration, data access, REST, AOP, auto-configuration, Actuator, security and the Spring testing framework to build enterprise and microservices applications. On completion, you will have a foundation for creating enterprise and cloud-ready applications. This course prepares you for the Spring Professional certification exam.

Delivery Types	Classroom, Live Online, vFlex, Private Training
Role	Application Developer
Level	Professional
Length	4 Days

[Register](#) now.

Take the [English On Demand](#) self-paced course.

Spring Boot: Developer

This two-day course offers experience with Spring Boot and its major features, including auto-configuration, Actuator, the Spring Boot testing framework and more. On completion, you will have a foundation for creating enterprise and cloud-ready applications. Please note that this course is a subset of the material in the four-day Spring: Core Training course; there is no need to take both courses. This course is recommended if you have a good working knowledge of Spring basics but are new to Spring Boot.

Delivery Types	Classroom, Live Online, vFlex, Private Training
Role	Application Developer
Level	Professional
Length	2 Days

[Register](#) now.

Take the [English On Demand](#) self-paced course.

Customer Recommended

94% of customers surveyed would recommend VMware training and certification to a friend or colleague.

VMworld 2019 Survey

Spring Security

This two-day course offers hands-on experience with the major features of Spring Security, which includes configuration, authentication, authorization, password handling, testing, protecting against security threats, and OAuth 2 support to secure applications. On completion, you will have a foundation for securing enterprise and microservices applications.

Delivery Types	Classroom, Live Online, vFlex, Private Training
Role	System Operator, System Administrator, System Integrator
Level	Professional
Length	2 Days

[Register](#) now.

VMware Tanzu Kubernetes Grid: Install, Configure, Manage [V1.3]

During this three-day course, you will focus on installing VMware Tanzu® Kubernetes Grid™ on a VMware vSphere® environment. Then, you will provision and manage Tanzu Kubernetes clusters. The concepts learned in this course should be transferable for users who need to install Tanzu Kubernetes Grid on other supported clouds.

Delivery Types	Classroom, Live Online, vFlex, Private Training
Role	System Operator, System Administrator, System Integrator
Level	Professional
Length	3 Days

[Register](#) now.

Take the [English On Demand](#) self-paced course.

VMware Tanzu Kubernetes Grid Integrated Edition: Install, Configure, Manage [V1.10]

This four-day, hands-on training course provides you with the knowledge, skills and tools to install, configure and manage VMware Tanzu® Kubernetes Grid™ Integrated Edition (formerly known as VMware Enterprise PKS). In this course, you are introduced to workflows of Tanzu Kubernetes Grid Integrated Edition to manage Kubernetes clusters using BOSH, and the integration of Tanzu Kubernetes Grid Integrated Edition with other VMware products.

In addition, you are presented with various types of technical problems, which you will identify, analyze and solve through a systematic process.

Delivery Types	Classroom, Live Online, vFlex, Private Training
Role	System Operator, System Administrator, System Integrator
Level	Professional
Length	4 Days

[Register](#) now.

VMware Tanzu Mission Control: Management and Operations 2022

During this two-day course, you will focus on using VMware Tanzu® Mission Control™ to provision and manage Kubernetes clusters. The course covers how to apply access, image registry, network, security, quota and custom policies to Kubernetes environments. For cluster provisioning and management, the course focuses on deploying, upgrading, backing up and monitoring Kubernetes clusters on VMware vSphere® with Tanzu. Given the abstractions of VMware Tanzu Mission Control, the learnings should be transferrable to public cloud.

Delivery Types	Classroom, Live Online, vFlex, Private Training
Role	System Operator, System Administrator, System Integrator
Level	Professional
Length	2 Days

[Register](#) now.

Take the [English On Demand](#) self-paced course.

Multi-Cloud

Use cloud-based solutions to manage work across different clouds and platforms.

Your IT estate is complicated, with workloads deployed natively in multiple clouds, multi-cloud Kubernetes, and VMware private and hybrid clouds. VMware delivers the multi-cloud operations capabilities you need to use any cloud with confidence, and make your digital business goals a reality.

Data Center Automation with vRealize Orchestrator and vSphere PowerCLI

This five-day course teaches experienced VMware vSphere® administrators how to use the powerful automation tools that all vSphere customers have access to. Using real-world use cases and examples, you will learn how to automate day-to-day administration tasks with VMware vSphere PowerCLI™ and VMware vRealize® Orchestrator™. During class, you will use these tools to automate tasks in a realistic lab environment.

Delivery Types	Classroom, Live Online, vFlex, Private Training
Role	Administrator
Level	Advanced
Length	5 Days

[Register](#) now.

VMware Cloud Foundation: Planning, Management, Operations [V4.3]

This five-day course includes instruction on the capabilities of VMware Cloud Foundation™ and how to successfully plan, deploy, manage and operate hybrid and cloud infrastructures, including customization. This course explains the architecture of VMware Cloud Foundation and explains licensing, certificates, and storage and network management. This course also covers workload domains, availability, lifecycle management, and troubleshooting.

Delivery Types	Classroom, Live Online, vFlex, Private Training
Role	System Operator, System Administrator, System Integrator
Level	Professional
Length	5 Days

[Register](#) now.

Take the [English On Demand](#) self-paced course.

VMware Cloud on AWS: Deploy, Configure, Manage 2021

This four-day, hands-on training course provides you with the knowledge, skills and tools for deploying and managing a VMware Cloud™ on AWS infrastructure. You will explore the common use cases of the VMware Cloud on AWS infrastructure that allows you to modernize, protect and scale applications based on VMware vSphere® that leverage AWS.

Delivery Types	Classroom, Live Online, vFlex, Private Training
Role	System Administrator, System Engineer, System Integrator
Level	Advanced
Length	4 Days

[Register](#) now.

Take the [English On Demand](#) self-paced course.

Take the [Japanese On Demand](#) self-paced course.

VMware Data Center Virtualization: Core Technical Skills

This four-day, hands-on training course is an introduction to VMware vSphere®. In this course, you will acquire the skills needed to perform Day 2 operational tasks that are typically assigned to the roles of operator or junior administrator in a vSphere environment.

Delivery Types	Classroom, Live Online, vFlex, Private Training
Role	System Operator, System Administrator, System Integrator
Level	Professional
Length	4 Days

[Register](#) now.

VMware HCX: Management and Operations

This four-day course gives you knowledge and practical exercises sufficient to manage VMware HCX® and to migrate virtual machines using VMware HCX. The course focuses on configuration and management of VMware HCX. The course equips system administrators with the knowledge, skills and abilities to achieve competence in migrating virtual machines.

Delivery Types	Classroom, Live Online, vFlex, Private Training
Role	Administrator, Architect, System Engineer, Migration Engineer
Level	Advanced
Length	4 Days

[Register](#) now.

VMware Integrated OpenStack: Install, Configure, Manage [V7]

This five-day course provides you with the skills to build a private cloud using VMware® Integrated OpenStack on a proven VMware software-defined data center (SDDC). Through a combination of lecture and hands-on labs, this course builds your skills in installing, configuring and managing VMware Integrated OpenStack. You will learn how to offer infrastructure as a service (IaaS) and platform as a service (PaaS) with advanced networking and security features to end users using VMware Integrated OpenStack.

Delivery Types	Classroom, Live Online, vFlex, Private Training
Role	Architect, System Engineer, Administrator
Level	Professional
Length	5 Days

[Register](#) now.

Take the [English On Demand](#) self-paced course.

VMware vSAN: Fast Track [V7]

During this five-day, intensive course, you will gain the knowledge, skills and tools to plan and deploy a VMware vSAN™ cluster. You will learn about managing and operating vSAN. This course focuses on building the required skills for common Day 2 vSAN administrator tasks, such as vSAN node management, cluster maintenance, security operations, and advanced vSAN cluster operations.

You will also focus on learning the tools and skills necessary to troubleshoot vSAN 7 implementations, and gain practical experience with vSAN troubleshooting concepts through the completion of instructor-led activities and hands-on lab exercises.

This course is a combination of the following courses: VMware vSAN: Plan and Deploy, VMware vSAN: Management and Operations, and VMware vSAN: Troubleshooting.

Delivery Types	Classroom, Live Online, vFlex, Private Training
Role	System Operator, System Administrator, System Integrator
Level	Professional
Length	5 Days

NEW VMware vSphere: Install, Configure, Manage [V8]

This five-day course features intensive hands-on training that focuses on installing, configuring and managing VMware vSphere® 8, which includes VMware ESXi™ 8 and VMware vCenter® 8. This course prepares you to administer a vSphere infrastructure for an organization of any size. This course is the foundation for most VMware technologies in the software-defined data center.

Delivery Types	Classroom, Live Online, vFlex, Private Training
Role	System Administrator, System Integrator, System Operator
Level	Professional
Length	5 Days

[Register](#) now.

NEW VMware vSphere: Operate, Scale and Secure [V8]

This five-day course teaches you advanced skills for configuring and maintaining a highly available and scalable virtual infrastructure. Through a mix of lecture and hands-on labs, you will configure and optimize the VMware vSphere® 8 features that build a foundation for a truly scalable infrastructure. You will also discuss when and where these features have the greatest effect. Attend this course to deepen your understanding of vSphere and learn how its advanced features and controls can benefit your organization.

Delivery Types	Classroom, Live Online, vFlex, Private Training
Role	System Administrator, System Operator
Level	Professional
Length	5 Days

[Register](#) now.

VMware vSphere with VMware Tanzu: Deploy and Manage [V7]

During this three-day course, you will focus on deploying and managing VMware vSphere® with VMware Tanzu®. You will learn about how vSphere with Tanzu can be used to orchestrate the delivery of Kubernetes clusters and containerized applications in a vSphere environment.

Delivery Types	Classroom, Live Online, vFlex, Private Training
Role	Operator, Administrator, Architect
Level	Advanced
Length	3 Days

VMware vSphere: What's New [V6.7 to V7]

In this three-day, hands-on training course, you will explore the new features and enhancements in VMware vCenter Server® 7 and VMware ESXi™ 7. Real-world use-case deployment scenarios, hands-on lab exercises and lectures will teach you the skills you need to effectively implement and configure VMware vSphere® 7.

Delivery Types	Classroom, Live Online, vFlex, Private Training
Role	System Architect, System Administrator, IT Manager
Level	Professional
Length	3 Days

Take the [English On Demand](#) self-paced course.

Register for the hands-on course with [Lab Connect](#).

VMware vSphere: Optimize and Scale plus Troubleshooting Fast Track [V7]

This five-day, accelerated, hands-on training course is a blend of the VMware vSphere: Optimize and Scale and VMware vSphere: Troubleshooting courses. This Fast Track course includes topics from each of these advanced courses to equip experienced VMware administrators with the knowledge and skills to effectively optimize and troubleshoot VMware vSphere® at an expert level.

Delivery Types	Classroom, Live Online, vFlex, Private Training
Role	System Administrator, System Engineer, System Integrator
Level	Professional
Length	5 Days

[Register](#) now.

VMware vSphere: Troubleshooting [V7]

This five-day, hands-on training course provides you with the advanced knowledge, skills and abilities to achieve competence in troubleshooting the VMware vSphere® 7.x environment. This workshop increases your skill and competence in using the command-line interface, VMware vSphere Client™, log files and other tools to analyze and solve problems.

Delivery Types	Classroom, Live Online, vFlex, Private Training
Role	System Administrator, System Integrator
Level	Professional
Length	5 Days

[Register](#) now.

VMware vSphere: Fast Track [V7]

This five-day, intensive course takes you from introductory to advanced VMware vSphere® 7 management skills. Building on the installation and configuration content from our best-selling course, you will also develop advanced skills needed to manage and maintain a highly available and scalable virtual infrastructure. Through a mix of lecture and hands-on labs, you will install, configure and manage vSphere 7. You will explore the features that build a foundation for a truly scalable infrastructure, and discuss when and where these features have the greatest effect. This course prepares you to administer a vSphere infrastructure for an organization of any size using vSphere 7, which includes VMware ESXi™ 7 and VMware vCenter Server® 7.

Delivery Types	Classroom, Live Online, Private Training
Role	System Administrator, System Engineer
Level	Professional
Length	5 Days

[Register](#) now.

VMware vSphere: Design [V7]

This three-day training course equips you with the knowledge, skills and abilities to design a VMware vSphere® 7 virtual infrastructure. You follow a proven approach to design a virtualization solution that ensures availability, manageability, performance, recoverability and security, and that uses VMware best practices. This course discusses the benefits and risks of available design alternatives, and provides information to support making sound design decisions.

Delivery Types	Classroom, Live Online, vFlex, Private Training
Role	System Integrator, Consultant
Level	Professional
Length	3 Days

[Register](#) now.

VMware vSphere: Advanced Administration Workshop [V7]

This five-day course provides hands-on training to equip students with a range of skills, from performing routine VMware vSphere® 7 administrative tasks to complex vSphere operations and configurations. Through lab-based activities, students are immersed in real-life situations faced by VMBeans, a fictitious company. These situations expose students to real-life scenarios faced by companies building and scaling their virtual infrastructure. Approximately 90 percent of the class is application-focused and taught through labs. The course aligns fully with the VMware Certified Advanced Professional – Data Center Virtualization Deploy exam objectives.

Delivery Types	Classroom, Live Online, vFlex, Private Training
Role	System Administrator, System Engineer
Level	Advanced
Length	5 Days

VMware vRealize Automation: Orchestration and Extensibility [V8.6]

During this five-day course, you will focus on using VMware vRealize® Orchestrator™ to extend the functionality of VMware vRealize Automation™. You will learn how to provide anything as a service (XaaS) and implement machine lifecycle extensibility using the vRealize Automation event broker. You will also learn how to create vRealize Orchestrator workflows and vRealize Automation Action Based Extensibility (ABX) actions. You will learn about various features, including basic scripting implementation along with logic processing to implement a variety of functions to use in your environment. This course teaches implementing debugging, loops, conditions and user interactions in vRealize Orchestrator.

The course introduces the new vRealize Orchestrator HTML 5 interface, along with API calls and REST functions, to give you the groundwork to implement a variety of plug-ins and scripts. This course is designed to give you the tools to craft custom solutions in the product.

Delivery Types	Classroom, Live Online, vFlex, Private Training
Role	System Operator, System Administrator, System Integrator
Level	Professional
Length	5 Days

VMware vRealize Automation: Troubleshooting [V8.6]

This three-day, hands-on training course provides you with the advanced knowledge, skills and tools to achieve competency in troubleshooting VMware vRealize® Automation™. vRealize Automation can be used to automate the delivery of virtual machines, applications, and personalized IT services across different data centers and hybrid cloud environments. This course will enable you to troubleshoot common problems with hands-on lab problems.

Delivery Types	Classroom, Live Online, vFlex, Private Training
Role	System Operator, System Administrator, System Integrator
Level	Professional
Length	3 Days

[Register](#) now.

VMware vRealize Automation: Install, Configure, Manage [V8.3]

During this five-day course, you will focus on installing, configuring and managing VMware vRealize® Automation™. You will learn about how vRealize Automation can be used to automate the delivery of virtual machines, applications, and personalized IT services across different data centers and hybrid cloud environments. This course makes heavy use of hands-on labs. Students can run 39 labs during the five-day course.

Delivery Types	Classroom, Live Online, vFlex, Private Training
Role	System Administrator, System Integrator
Level	Advanced
Length	5 Days

VMware vRealize Automation: Advanced Features and Troubleshooting [V8.x]

This five-day course is a follow-on to the VMware vRealize Automation: Install, Configure, Manage course. In this course, you will go deeper into the advanced features of VMware vRealize® Automation™ to deploy user systems and interface vRealize Automation with other platforms. You will learn how to deploy an enterprise-level cluster environment using VMware vRealize Suite Lifecycle Manager™. This course relies heavily on hands-on labs.

Delivery Types	Classroom, Live Online, vFlex, Private Training
Role	System Administrator, System Integrator
Level	Professional
Length	5 Days

[Register](#) now.

VMware vRealize Automation SaltStack Config: Deploy and Manage [V8.4]

This three-day, hands-on training course provides you with the advanced knowledge, skills and tools to achieve competency in deploying and using VMware vRealize® Automation SaltStack® Config. SaltStack Config is a powerful software configuration management component available in vRealize Automation. With SaltStack Config, you can easily define optimized, secure software states and enforce them across your entire environment, including virtualized, hybrid or public cloud systems.

In this course, you are introduced to configuration management and how SaltStack Config can install software, maintain system configurations, change systems immediately with scalable remote execution, and automatically correct configuration problems in deployed virtual applications.

Delivery Types	Classroom, Live Online, vFlex, Private Training
Role	System Operator, System Administrator, System Integrator
Level	Professional
Length	3 Days

VMware vRealize Automation SaltStack SecOps: Deploy and Manage [V8.6]

This two-day, hands-on training course provides you with the advanced knowledge, skills and tools to achieve competency in using VMware vRealize® Automation SaltStack® SecOps. SaltStack SecOps allows you to scan your system for compliance against security benchmarks, detect system vulnerabilities, and remediate your results. This course enables you to create the SaltStack SecOps custom compliance libraries and use SaltStack SecOps. In addition, this course provides you with the fundamentals of how to use VMware vRealize Automation SaltStack Config to install software and manage system configurations.

Delivery Types	Classroom, Live Online, vFlex, Private Training
Role	System Operator, System Administrator, System Integrator
Level	Professional
Length	2 Days

VMware vRealize Log Insight: Deploy and Manage [V8.4]

This two-day course focuses on deploying, using and managing VMware vRealize® Log Insight™. It provides you with the knowledge and skills to deploy a vRealize Log Insight cluster that meets the monitoring requirements of your environment. You will learn about the configuration and use of vRealize Log Insight to collect and manage logs from a variety of VMware and third-party products. This course discusses interfacing vRealize Log Insight with other systems to monitor, troubleshoot and secure a data center.

Delivery Types	Classroom, Live Online, vFlex, Private Training

NEW VMware vRealize Operations: Install, Configure, Manage [V8.6]

This five-day, hands-on training course provides you with the knowledge and skills to deploy a VMware vRealize® Operations™ cluster that meets the monitoring requirements of your environment. This course includes advanced capabilities, such as customizing alerts, views, reports, and dashboards, and explains the architecture in vRealize Operations. This course explains application monitoring, certificates, capacity and cost concepts, and workload optimization with real-world use cases. This course covers troubleshooting using the workbench, alerts, and redefined dashboards, and describes how to manage compliance and configurations. This course also covers several management packs.

Delivery Types	Classroom, Live Online, vFlex, Private Training
Role	System Operator, System Administrator, System Integrator
Level	Professional
Length	5 Days

Take the [English On Demand](#) self-paced course.

Troubleshooting VMware vRealize Operations [V8.x]

This two-day course gives VMware vRealize® Operations™ administrators the skills to perform basic troubleshooting tasks. The course also gives administrators the skills to ensure their vRealize Operations instance meets its use-case objectives of continuous performance optimization, app-aware intelligent remediation, and integrated compliance.

Delivery Types	Classroom, Live Online, vFlex, Private Training
Role	System Administrator
Level	Professional
Length	2 Days

NEW VMware vRealize Operations: Install, Configure, Manage [V8]

This five-day course includes instruction on advanced capabilities, including customization and management, and explains the architecture of VMware vRealize® and different ways of deploying vRealize Operations™. This course explains certificates, capacity concepts and workload optimization with real-world use cases. This course covers troubleshooting using dashboards and how-to managing configurations. This course also covers management packs such as those for or in the SDDC Management Health solution, VMware vRealize Service Discovery™ Management Pack, and VMware vRealize Orchestrator™.

Delivery Types	Classroom, Live Online, vFlex, Private Training
Role	Administrator, Engineer
Level	Advanced
Length	5 Days

VMware Cloud Director: Install, Configure, Manage [V10.3]

In this five-day course, you will focus on installing, configuring and managing VMware Cloud Director™ 10.3. You will learn about workload provisioning, the creation of organizations, virtual data centers (VDCs), catalog services that include predefined virtual machines (VMs), and on-demand VMware NSX-T™ Data Center networks.

This course also covers interfacing VMware Cloud Director with other systems and the integration and use of VMware vRealize® Orchestrator™ for VMware Cloud Director. You will learn about different networks that a system administrator and an organization administrator can configure and use with VMs. This course also discusses how to monitor various VMware Cloud Director objects using VMware vRealize Operations™.

VMware Cloud Director: Advanced Workshop [V10.2]

This five-day, hands-on training course provides you with the advanced knowledge, skills and tools to design and utilize a cloud based on VMware Cloud Director™. Besides learning about an advanced cloud architecture, you will learn about the integration of VMware Cloud Director with VMware Cloud Director Availability™, VMware vRealize® Orchestrator™, VMware vRealize Operations™ (including the tenant app), VMware NSX-T™ Data Center and VMware NSX® Advanced Load Balancer™. This course covers the migration from VMware NSX Data Center for vSphere® to NSX-T Data Center in a VMware Cloud Director environment. You will learn how NSX Advanced Load Balancer can be used and integrated in a service provider environment. Besides the advanced know-how of the vRealize Operations tenant app and VMware Cloud Director Availability, the course also discusses the extensibility and orchestration of workflows in VMware Cloud Director. For all the topics covered in the class, intensive hands-on labs will be taken by the students to provide proper insights into all the products.

VMware Cloud Director: Install, Configure, Manage [V10.1]

In this five-day course, you will focus on installing, configuring and managing VMware Cloud Director™ 9.x. You will learn about self-service provisioning, the creation of organizations, virtual data centers (VDCs), catalog services that include predefined virtual machines, and on-demand VMware NSX® networks. This course also covers interfacing VMware Cloud Director with other systems using various APIs and the integration and use of VMware Cloud Director Availability™. You will also understand how to manage multisite, cross-VDC networking for VMware Cloud Director and configuring a central point of management to define a software-defined datacenter for tenant and provider users of VMware Cloud Director. This course also discusses how to monitor various VMware Cloud Director objects using VMware vRealize® Operations™, tenant vApp and VMware vRealize Log Insight™.

Virtual Cloud Network

Connect and secure apps and data, regardless of where they run, from data center to cloud to edge infrastructure.

Power your business with a network defined entirely in software. Built on best-in-class VMware technologies, a virtual cloud network connects and secures your apps and data across private, public and edge/branch clouds with a scale-out approach that's independent of the underlying physical infrastructure.

Migration from VMware NSX for vSphere to NSX-T

This three-day, hands-on training course provides you with the skills, techniques and tools required to successfully migrate your current VMware NSX® Data Center for vSphere® environment to VMware NSX-T™ Data Center. You will learn to choose between different migration approaches and how to perform the type of migration that best suits your current environment. In addition, you are presented with common migration problems and resolutions.

Maximize Value with Private VMware Training

Private training is the perfect option for organizations that need a cost-effective way to train a large number of employees all at once. The cost per student is lower than the cost of a public class, you can tailor the content to your specific needs, and class is scheduled around your schedule, not ours. We also work with you to meet your schedule and location requirements, minimizing time away from work for your key staff.

Anywhere Workspace

Deliver a secure, consumer-like user experience on any device.

Enable a holistic change in the way end-user services are delivered by IT, so you can deliver the apps and data employees need to work across any device. By taking advantage of today's cloud-based management technologies, digital workspace solutions deliver self-service, out-of-the-box experiences that scale across platforms, locations and device ownership models.

VMware App Volumes and Dynamic Environment Manager

This three-day course builds your skills in application management using VMware App Volumes™ and VMware Dynamic Environment Manager™. You will learn how to use App Volumes to deliver applications and data to desktops and users in seconds and at scale. You will gain skills in managing application lifecycles from installation to update and replacement. You will also learn how to use VMware Dynamic Environment Manager to provide personalization and dynamic policy configuration across virtual, physical and cloud-based environments to simplify end-user profile management.

VMware Horizon 8: Troubleshooting Bootcamp

This five-day course builds your skills in resolving common issues that occur in a VMware Horizon® environment. You will engage in a series of lab exercises to bring existing environment issues to resolution. The exercises mirror real-world troubleshooting use cases. This workshop teaches the required skills and competence for troubleshooting VMware Horizon Connection Server™, VMware Unified Access Gateway™, protocols, connections, and certificates.

Delivery Types	Classroom, Live Online, vFlex, Private Training
Role	System Operator, System Administrator, System Integrator
Level	Professional
Length	5 Days

[Register](#) now.

VMware Horizon 8: Deploy and Manage

This five-day course is a combination of VMware Horizon 8: Skills for Virtual Desktop Management and VMware Horizon 8: Infrastructure Administration. This training collection gives you the hands-on skills to deliver virtual desktops and applications through a single virtual desktop infrastructure platform. You will build on your skills in configuring and managing VMware Horizon® 8 through a combination of lecture and hands-on labs. You will learn how to configure and deploy pools of virtual machines, and provide a customized desktop environment to end users. Additionally, you will learn how to install and configure a virtual desktop infrastructure platform. You will learn how to install and configure VMware Horizon Connection Server™ and VMware Unified Access Gateway™, how to configure a load balancer for use with Horizon, and how to establish Cloud Pod Architecture.

Delivery Types	Classroom, Live Online, vFlex, Private Training
Role	System Operator, Administrator, Architect
Level	Professional
Length	5 Days

VMware Horizon 8: Virtual Desktop Bootcamp

VMware Horizon® 8: Virtual Desktop Bootcamp is a five-day combination course of VMware Horizon 8: Skills for Virtual Desktop Management and VMware Horizon 8: Virtual Desktop Troubleshooting. This training combination gives you the skills to deliver virtual desktops and applications through a single virtual desktop infrastructure platform.

Delivery Types	Classroom, Live Online, vFlex, Private Training
Role	Operator, Administrator, Architect
Level	Advanced
Length	5 Days

VMware Horizon 8: Virtual Desktop Troubleshooting

This two-day course builds your skills in resolving common issues that occur in a VMware Horizon® environment. You will engage in a series of lab exercises to bring existing environment issues to resolution. The exercises mirror real-world troubleshooting use cases. These exercises equip you with the knowledge and practical skills to manage typical challenges faced by virtual desktop administrators and operators.

Delivery Types	Classroom, Live Online, vFlex, Private Training
Role	System Operator, Administrator, Integrator
Level	Professional
Length	2 Days

VMware Horizon Cloud Service: Deploy and Manage on Microsoft Azure

This five-day, hands-on training provides you with the knowledge, skills and abilities to achieve competence in deploying and managing VMware Horizon® Cloud Service™ on Microsoft Azure. This training increases your skills and competence in using the Horizon Cloud administration console and the Microsoft Azure portal.

Delivery Types	Classroom, Live Online, vFlex, Private Training
Role	Engineer, Administrator, Architect, System Integrator
Level	Professional
Length	5 Days

NEW VMware Workspace ONE: Deploy and Manage [V22.x]

In this five-day course, you will learn how to apply the fundamental techniques for launching and maintaining an intelligence-driven, multiplatform, endpoint management solution with VMware Workspace ONE® UEM. Through a combination of hands-on labs, simulations, and interactive lectures, you will configure and manage the endpoint lifecycle. After the course, you will have the foundational knowledge for effectively implementing Workspace ONE UEM.

You will also learn how to apply the fundamental techniques for integrating VMware Workspace ONE Access™ with Workspace ONE UEM to securely distribute business-critical applications from any device and configure access management controls. Through a combination of hands-on labs, simulations, and interactive lectures, you will configure Workspace ONE Access and Workspace ONE UEM system and productivity integrations.

You will leave with a foundational understanding of how Workspace ONE uses various authentication methods and protocols to determine user access permissions and enable single sign-on. Overall, the course lays out the foundational principles of identity and access management.

Please note: This course is a combination of the VMware Workspace ONE: Skills for UEM and the VMware Workspace ONE: Integrations courses.

Delivery Types	Classroom, Live Online, vFlex, Private Training
Role	System Operator, System Administrator, System Integrator
Level	Professional
Length	5 Days

NEW VMware Workspace ONE: Deploy and Manage plus UEM Troubleshooting Fast Track [V22.x]

In this extended five-day course, you will learn how to apply the fundamental techniques for launching and maintaining an intelligence-driven, multiplatform endpoint management solution with VMware Workspace ONE® UEM. Through a combination of hands-on labs, simulations, and interactive lectures, you will configure and manage the endpoint lifecycle. After the course, you will have the foundational knowledge necessary to implement Workspace ONE UEM effectively.

You will learn how to apply the fundamental techniques for integrating Workspace ONE Access™ with Workspace ONE UEM to distribute business-critical applications securely from any device and configure access management controls. You will learn how Workspace ONE uses various authentication methods and protocols to determine user access permissions and enable single sign-on. You will leave with an understanding of the fundamental principles of identity and access management.

You will learn to investigate, analyze and determine issues that might occur with the different components of Workspace ONE UEM. Troubleshooting is the backbone of service maintenance and management. By understanding how to effectively troubleshoot product issues, administrators can understand how product services communicate and function, in turn optimizing service and software health management.

Delivery Types	Classroom, Live Online, vFlex, Private Training
Role	System Operator, System Administrator, System Integrator
Level	Professional
Length	5 Days

NEW VMware Workspace ONE: Integrations [V22.x]

In this two-day course, you will learn how to apply the fundamental techniques for integrating VMware Workspace ONE® Access™ with VMware Workspace ONE UEM to securely distribute business-critical applications from any device and configure access management controls. Through a combination of hands-on labs, simulations, and interactive lectures, you will configure system and productivity integrations for Workspace ONE Access and Workspace ONE UEM. The course provides the principles of identity and access management. You will leave with a foundational understanding of how Workspace ONE uses various authentication methods and protocols to determine user access permissions and enable single sign-on.

Delivery Types	Classroom, Live Online, vFlex, Private Training
Role	System Operator, System Administrator, System Integrator
Level	Professional
Length	2 Days

NEW VMware Workspace ONE: Skills for UEM [V22.x]

In this three-day course, you will learn how to apply the fundamental techniques for launching and maintaining an intelligence-driven, multiplatform, endpoint management solution with VMware Workspace ONE® UEM. Through a combination of hands-on labs, simulations, and interactive lectures, you will configure and manage the endpoint lifecycle. After the course, you will have the foundational knowledge for effectively implementing Workspace ONE UEM.

Delivery Types	Classroom, Live Online, vFlex, Private Training
Role	System Operator, System Administrator, System Integrator
Level	Professional
Length	3 Days

NEW VMware Workspace ONE: UEM Bootcamp [V22.x]

In this five-day course, you will learn how to apply the fundamental techniques for launching and maintaining an intelligence-driven, multiplatform endpoint management solution with VMware Workspace ONE® UEM. Through a combination of hands-on labs, simulations, and interactive lectures, you will configure and manage the endpoint lifecycle. You will also learn to investigate, analyze and determine issues that might occur with all the different components of Workspace ONE UEM.

By understanding how to effectively troubleshoot product issues, administrators can understand how product services communicate and function, in turn optimizing service and software health management. At the end of five days, you will have the foundational knowledge for effectively managing and conducting basic troubleshooting for Workspace ONE UEM.

Delivery Types	Classroom, Live Online, vFlex, Private Training
Role	System Operator, System Administrator, System Integrator
Level	Advanced
Length	5 Days

Security

Learn how to leverage your infrastructure to protect apps and data from endpoint to cloud.

Leverage your infrastructure to provide adaptive protection for your apps and data, regardless of their location or movement. Seamlessly secure your data centers, clouds and endpoints, so your users have the flexibility and freedom to work as they wish.

VMware Carbon Black App Control Administrator

This one-day course teaches you how to use the VMware Carbon Black® App Control™ product and leverage the capabilities to configure and maintain the system according to your organization's security posture and organizational policies. This course provides an in-depth, technical understanding of the Carbon Black App Control product through comprehensive coursework and hands-on, scenario-based labs.

Delivery Types	Classroom, Live Online, vFlex, Private Training
Role	System Administrator, Security Operations Personnel

VMware Carbon Black Portfolio: Configure and Manage

This five-day course teaches you how to install, configure and manage the VMware Carbon Black portfolio of products, which includes:

- VMware Carbon Black® App Control™ Administrator
- VMware Carbon Black EDR™ Administrator
- VMware Carbon Black Cloud Endpoint™ Standard
- VMware Carbon Black Cloud Audit and Remediation™
- VMware Carbon Black Cloud Enterprise EDR™

Learn how to use the capabilities of the products according to the organization's security posture and organizational policies. This course provides an in-depth, technical understanding of the VMware Carbon Black portfolio through comprehensive coursework, hands-on labs and scenario-based exercises.

Delivery Types	Classroom, Live Online, vFlex, Private Training
Role	System Administrator, Security Operations Personnel
Level	Professional
Length	5 Days
