

VMware Training Schedule

Training Courses	Overview	Length	L/P
DataCenter Virtualization			
VMware vSphere: Install, Configure, Manage [V6.0]	This hands-on training course explores installation, configuration, and management of VMware vSphere®, which consists of VMware ESXi™ and VMware® vCenter Server™. This course is based on versions of ESXi 5.5 and vCenter Server 6. Completion of this course satisfies the prerequisite for taking the VMware® Certified Professional 5 exam.	5 days	USD 3000
VMware vSphere : What's New [V5.5 to V6.0]	VMware vSphere: What's New is a hands-on training course that explores the newest features and enhancements in VMware vCenter Server™ 6 and VMware ESXi™ 6. Real-world use case deployment scenarios, hands-on lab exercises, and lecture material teach the skills you need to effectively implement and configure VMware vSphere® 6.	2 days	USD 1200
VMware vSphere : Skill for Operator	VMware vSphere: Skills for Operators is a two-day technical classroom training course designed to help operators and administrators create and manage virtual machines. This two-day lecture and lab course will help students gain the skills required to work effectively with VMware® virtual machines. VMware® vCenter Server™ 6.0	2 days	USD 1200
VMware vSphere: Design and Deploy [V6.0] *VMware SV Competency	This extended-hours training course equips you with the knowledge, skills, and abilities to design and deploy a VMware vSphere® 6.0 virtual infrastructure. You follow a proven approach to design and deploy a virtualization solution that is available, scalable, manageable, and secure. This course discusses the benefits and risks of available design alternatives and provides information to support making sound design decisions.	5 days	USD 4670
VMware vSphere: Optimize and Scale [V6.0]	This training course, for experienced VMware vSphere® personnel, teaches advanced skills for configuring and maintaining a highly available and scalable virtual infrastructure. The course is based on VMware® ESXi™ 6.0 and VMware® vCenter Server™ 6.0.	5 days	USD 3300
VMware vSphere: Troubleshooting Workshop [V6.0]	This hands-on training workshop provides you with the advanced knowledge, skills, and abilities to achieve competence in troubleshooting the VMware vSphere® environment. This workshop also increases your skill and competence in using the command-line interface to analyze problems.	5 days	USD 3300
End User Computing			
VMware Horizon View: Install, Configure, Manage [V6.2] VMware DV Competency	This hands-on training course builds your skills in installing, configuring, and managing the Horizon™ View™ component of VMware Horizon™. Students gain practical experience with these concepts through the completion of hands-on labs. View includes: VMware View® Manager™, VMware View® Composer™, and View security server. This course is based on the Horizon 6 release.	4 days	USD 2400
VMware View: Design and Deploy [V6.X] VMware DV Competency	This extended-hours training course equips you with the knowledge, skill and abilities to design and deploy a VMware View V.6X virtual desktop. You follow a proven approach to design and deploy a Desktop virtualization solution that is available, scalable, manageable and secure. This course discusses the benefits and risks of available design alternatives and provides information to support making sound design decisions.	5 days	USD 4670
vSAN Deploy and Manage [V6.0]	This training course focuses on deploying and managing a software-defined storage solution with VMware® Virtual SAN™ 5.5. This course looks at how Virtual SAN is used as an important component in the VMware® software-defined data center (SDDC). Students gain practical experience with these concepts through the completion of hands-on labs.	3 days	USD 1800
Cloud			
VMware vRealize Automation :Install, Configure, manage [V6.2]	This training course focuses on installing, configuring, and managing VMware vCloud® Automation Center™. This course covers the configuration and use of the vCloud Automation Center platform, including self-service provisioning and the creation of multivendor cloud services. VMware Management Automation Competency	5 days	USD3,000

VMware Training Schedule

VMware vRealize Operations Manager : Install, Configure, anage [V.6.0] VMware Management Operation Competency	VMware vRealize™ Operations Manager™: Install, Configure, Manage is designed for experienced VMware vSphere® users and teaches how to use VMware vRealize Operations Manager as a forensic and predictive tool. The course is based on VMware ESXi™ 5.x, VMware vCenter Server™ 5.x, and vRealize Operations Manager 6.0 and includes instruction on advanced capabilities including customization and management.	5 days	USD 3300
VMware vCenter Operations Manager: Analyze and Predict [V5.x]	This course for experienced users of VMware® vSphere® teaches skills in the use of VMware® vCenter™ Operations Manager™ as a forensic and predictive tool. The course is based on VMware ESXi™ 5.x, VMware® vCenter Server™ 5.x, and vCenter Operations Manager 5.x.	2 days	USD1,200
VMware vCenter Site Recovery Manager : Install, Configure, Manage[V6]	This two-day, hands-on training course equips experienced VMware vSphere administrators with the knowledge to install, configure, and manage VMware vCenter site recovery Manager 6.x This course also equips vSphere administrators with the knowledge to assist in writing and testing disaster recovery plans that use vCenter Site Recovery Manager.	2 days	USD1,200
VMware NSX : Install Configure, Manage [V6.2]	This comprehensive, fast-paced training course focuses on installing, configuring, and managing VMware NSX™. This course covers NSX as a part of the software-defined data center platform, implementation use cases along with features of NSX, and functionality operating at Layer 2 through Layer 7 of the OSI model. Lecture and hands-on lab activities support the student's understanding of NSX features,	5 days	USD 3000
VMware NSX for Internetworking Experts Fast Track [V6.1]	This comprehensive, fast-paced training course focuses on installing, configuring, and managing VMware NSX™. This course covers NSX as a part of the software-defined data center platform, implementation use cases along with features of NSX, and functionality operating at Layer 2 through Layer 7 of the OSI model.	5 days	USD 4620
SDDC Intensive Workshop	To enable you to build true customer-centric solutions, this intensive workshop leverages a set of architectural discussions, hands-on lab exercises, and rich demonstrations of the software-defined data center (SDDC). This workshop focuses on helping you develop experience-based confidence in building solutions by investigating the VMware® software suite. Through intensive expert-to-expert training, this workshop turns product experts into solution experts.	5 days	USD 4620
AirWatch			
AirWatch Enterprise Mobility : BootCamp	This course take you from learning the foundational skills needed to configure and manage your AirWatch environment to advanced operations on the Airwatch platform. You will learn how to enable containerized applications , deploy and manage corporate email and integrate AirWatch with your enterprise resources.	4 days	USD 2240
AirWatch Enterprise Mobility: Install and Deploy on Premise Solution (Expert)	This course provided the skills needed to install, configure and upgrade an on premise AirWatch server, You will have access to hands-on labs, learn upgrade options and strategies and troubleshooting common installation and upgrade issues. Advanced installation techniques are discussed, including the use of high availability and redundancy.	1 days	USD 720
