Table of contents

App Modernization

VMware Enterprise PKS: Install, Configure, Manage [V1.5]	4
NEW VMware Tanzu Kubernetes Grid: Install, Configure, Manage [V1.0]	4
NEW VMware Tanzu Mission Control: Management and Operations 2020	4
VMware vSphere with Kubernetes: Deploy and Manage [V7]	4

Multi-Cloud

Security Operations for the Software-Defined Data Center	5
Data Center Automation with vRealize Orchestrator and vSphere PowerCLI	5
VMware Cloud Automation: Design and Deploy [V7.1]	5
NEW VMware Cloud Foundation: Management and Operations [V4.0]	5
NEW VMware Cloud Foundation: Plan and Deploy [V4.0]	6
VMware Cloud Foundation: Management and Operations [V3.9.1]	6
NEW VMware Cloud on AWS: Deploy and Manage 2020	6
VMware Integrated OpenStack: Install, Configure, Manage [V5]	7
NEW VMware vSAN: Troubleshooting [V7]	7
VMware vSAN: Deploy and Manage [V6.7]	8
VMware vSAN: Production Operations [V6.7]	8
VMware vSAN: Troubleshooting Workshop [V6.x]	9
VMware PowerCLI for vSAN – On Demand	9
VMware vSphere: What's New [V6.7 to V7]	9
VMware vSphere: Install, Configure, Manage [V7]	9
VMware vSphere: Optimize and Scale [V7]	10
NEW VMware vSphere: Optimize and Scale plus Troubleshooting Fast Track [V7]	10
VMware vSphere: Troubleshooting [V7]	10
VMware vSphere: Fast Track [V7]	10
VMware vSphere: Design [V7]	11
VMware vSphere: What's New [V5.5 to V6.7]	11
VMware vSphere: Install, Configure, Manage [V6.7]	12
VMware vSphere: Optimize and Scale [V6.7]	12
VMware vSphere: Optimize and Scale plus Troubleshooting Fast Track [V6.7]	13
VMware vSphere: Troubleshooting Workshop [V6.7]	13
VMware vSphere: Advanced Troubleshooting Workshop [V6.7]	13
VMware vSphere: Skills for Public Sector Administrators [V6.7]	13
VMware vSphere: Fast Track [V6.7]	14
VMware vSphere: Practitioner Workshop [V6.7]	14
VMware Advanced Skills for vSphere Professional Workshop [V6.7]	14
VMware vSphere: What's New [V5.5 to V6.5]	14
VMware vSphere: Install, Configure, Manage [V6.5]	15
VMware vSphere: Optimize and Scale [V6.5]	15
VMware vSphere: Install, Configure, Manage plus Optimize and Scale Fast Track [V6.5]	16
VMware vSphere: Troubleshooting Workshop [V6.5]	16
VMware vSphere: Design Workshop [V6.5]	17

VMware vSphere: Fast Track [V6.5]	17
VMware vSphere: Optimize and Scale plus Troubleshooting Fast Track [V6.5]	17
VMware vRealize Automation: Install, Configure, Manage [V8]	17
NEW VMware vRealize Automation: Advanced Features and Troubleshooting [V8.x]	18
NEW VMware vRealize Automation: Orchestration and Extensibility [V8.1]	18
VMware vRealize Automation: Install, Configure, Manage [V7.6]	18
VMware vRealize Automation: Orchestration and Extensibility [V7.6]	19
VMware vRealize Automation: Design and Deploy [V7.6]	19
VMware vRealize Automation: What's New [V7.3 to V7.5] – On Demand	19
VMware vRealize Log Insight: Deploy and Manage [V4.7]	19
VMware vRealize Operations: What's New [V6.6 to V7] – On Demand	20
VMware vRealize Operations: Install, Configure, Manage [V8]	20
VMware vRealize Operations: Install, Configure, Manage [V7]	21
VMware vRealize Operations for Administrators [V7]	21
VMware vRealize Operations and vSAN Integration Workshop	22
VMware vRealize Suite Lifecycle Manager: Install, Configure, Manage [V8.0]	22
VMware Site Recovery Manager: Install, Configure, Manage [V8.2]	22
VMware vCloud Director: Install, Configure, Manage [V9.7]	23
VMware vCloud Director: Tenant Operations [V10.x]	23
VMware vCloud NFV with vCloud Director [V9.7]	23

Virtual Cloud Network

NEW VMware NSX-T Data Center: Install, Configure, Manage [V3.0]	24
NEW VMware NSX-T Data Center: Design [V3.0]	24
NEW VMware NSX-T Data Center: Troubleshooting and Operations [V3.0]	24
VMware NSX-T Data Center: Install, Configure, Manage [V2.4]	25
VMware NSX-T Data Center: Design [V2.4]	25
VMware NSX-T Data Center: Troubleshooting and Operations [V2.4]	26
VMware NSX: Install, Configure, Manage [V6.4]	26
VMware NSX: Install, Configure, Manage plus Troubleshooting and Operations Fast Track [V6.4]	27
VMware NSX: Troubleshooting and Operations [V6.4]	27
VMware NSX: Micro-Segmentation [V6.3]	28
VMware NSX: Design and Deploy [V6.2]	28
NEW VMware Introduction to Application Delivery Controller with NSX Advanced Load Balancer	28
NEW VMware NSX Advanced Load Balancer: Global Server Load Balancing Design and Deploy	29
NEW VMware NSX Advanced Load Balancer: Infrastructure and Application Automation	29
NEW VMware NSX Advanced Load Balancer: Install, Configure, Manage	29
NEW VMware NSX Advanced Load Balancer: Install, Configure, Manage plus Troubleshooting and Operations Fast Track	29
NEW VMware NSX Advanced Load Balancer: Troubleshooting and Operations	30

Table of contents (continued)

Virtual Cloud Network (continued)

NEW VMware NSX Advanced Load Balancer: Web Application Firewall Security	30
VMware SD-WAN by VeloCloud: Deploy and Manage	30
VMware vRealize Network Insight: Install, Configure, Manage [V5.0]	30

Digital Workspace

VMware App Volumes and Dynamic Environment Manager	31
VMware Horizon 7: Install, Configure, Manage [V7.10]	31
VMware Horizon 7: Install, Configure, Manage [V7.7]	32
VMware Horizon 7: Install, Configure, Manage plus App Volumes Fast Track [V7.10]	32
VMware Horizon 7: What's New [V6.x to V7.x]	33
VMware Horizon Cloud Service on Microsoft Azure: Deploy and Manage	33
VMware Horizon 7: Design Workshop [V7]	33
VMware Workspace ONE: Deploy and Manage [V20.x]	34
VMware Workspace ONE: Integrating the Digital Workspace [V20.x]	34
VMware Workspace ONE: Skills for Unified Endpoint Management [V20.x]	35
VMware Workspace ONE: Unified Endpoint Management Bootcamp [V20.x]	35
VMware Workspace ONE: Unified Endpoint Management for Windows 10 [V20.x]	36
VMware Workspace ONE: Unified Endpoint Management Troubleshooting [V20.x]	36
VMware Workspace ONE: Advanced Integration [V20.x]	36
VMware Workspace ONE: Design [V20.x]	36
VMware Workspace ONE: Unified Endpoint Management Troubleshooting, Advanced Integration and Design Fast Track [V20.x]	37

Intrinsic Security

NEW VMware Carbon Black App Control Administrator	37
NEW VMware Carbon Black App Control Advanced Administrator	38
NEW VMware Carbon Black Cloud Audit and Remediation	38
NEW VMware Carbon Black Cloud Endpoint Standard	38
NEW VMware Carbon Black Cloud Enterprise EDR	38
NEW VMware Carbon Black EDR Administrator	39
NEW VMware Carbon Black EDR Advanced Administrator	39
NEW VMware Carbon Black EDR Advanced Analyst	39

App Modernization

Modernize application development to accelerate digital innovation.

You have hundreds or even thousands of applications—both existing monoliths and new cloud native microservices. They're all different and all critical to your business. Leverage VMware technologies that enable you to build, run and manage all your applications across any cloud.

VMware Enterprise PKS: Install, Configure, Manage [V1.5]

This five-day course features intensive hands-on training that focuses on installing, configuring and managing VMware® Enterprise PKS 1.5 (a purpose-built container solution to operationalize Kubernetes for multi-cloud enterprises and service providers). VMware Enterprise PKS significantly simplifies the deployment and management of Kubernetes clusters with Day 1 and Day 2 operations support. This course prepares you to install and administer a VMware Enterprise PKS environment for an organization of any size.

Delivery Types	Classroom, Live Online, vFlex-ILT, Onsite
Role	Administrator, Engineer
Level	Professional
Length	5 Days

[Register](#) now.

NEW VMware Tanzu Kubernetes Grid: Install, Configure, Manage [V1.0]

During this two-day course, you will focus on installing VMware Tanzu™ Kubernetes Grid™ on a VMware vSphere® environment. Then, you will provision and manage Tanzu Kubernetes clusters.

Delivery Types	Classroom, Live Online, vFlex-ILT, Onsite
Role	Administrator
Level	Professional
Length	2 Days

[Register](#) now.

NEW VMware Tanzu Mission Control: Management and Operations 2020

During this one-day course, you will focus on using VMware Tanzu™ Mission Control™ to provision and manage Kubernetes clusters. This course covers how to manage on-premises and cloud-based Kubernetes clusters, and how to apply access, image registry and network policies to clusters.

Delivery Types	Classroom, Live Online, vFlex-ILT, Onsite
Role	VI Administrator, Application Owner
Level	Professional
Length	1 Day

[Register](#) now.

VMware vSphere with Kubernetes: Deploy and Manage [V7]

During this three-day course, you will focus on deploying and managing VMware vSphere® with Kubernetes. You will learn about how vSphere with Kubernetes can be used to orchestrate the delivery of Kubernetes clusters and containerized applications in a vSphere environment.

Delivery Types	Classroom, Live Online, vFlex-ILT, Onsite
Role	System Administrator, System Integrator
Level	Professional
Length	3 Days

[Register](#) now.

CUSTOMER RECOMMENDED

94% of customers surveyed would recommend VMware training and certification to a friend or colleague.

VMWORLD 2019 SURVEY

Multi-Cloud

Use cloud-based solutions to manage work across different clouds and platforms.

Your IT estate is complicated, with workloads deployed natively in multiple clouds, multi-cloud Kubernetes, and VMware private and hybrid clouds. VMware delivers the multi-cloud operations capabilities you need to use any cloud with confidence, and make your digital business goals a reality.

Security Operations for the Software-Defined Data Center

In this course, we teach you how to use the VMware Software-Defined Data Center product portfolio and tools to better manage administrator access, harden your VMware vSphere® environment, and secure data at rest and in motion. We also discuss compliance and automation to help you ensure that your deployments align with your security policies.

Delivery Types	Classroom, Live Online, Onsite
Role	Architect, Engineer, Administrator
Level	Advanced
Length	5 Days

[Register now.](#)

Data Center Automation with vRealize Orchestrator and vSphere PowerCLI

This course equips experienced VMware vSphere® administrators with the knowledge to use the automation tools that all vSphere customers have access to. Using real-world use cases and examples, you will learn how to automate day-to-day administration tasks with VMware vSphere® PowerCLI™ and VMware vRealize® Orchestrator™. In this class, you use these tools to automate tasks in a lab environment.

Delivery Types	Classroom, Live Online, vFlex-ILT, Onsite
Role	Administrator
Level	Advanced
Length	5 Days

[Register now.](#)

VMware Cloud Automation: Design and Deploy [V7.1]

This five-day course focuses on designing and deploying an enterprise cloud by using a distributed architecture deployment of VMware vRealize® Automation™. The lecture and labs concentrate on designing an enterprise cloud architecture and the effective implementation of a vRealize Automation distributed deployment according to VMware recommended best practices.

Delivery Types	Classroom, Live Online, vFlex-ILT, Onsite
Role	Architect, Engineer
Level	Expert
Length	5 Days
Related Certification	VMware Certified Professional 7 – Cloud Management and Automation (VCP7-CMA)

[Register now.](#)

NEW VMware Cloud Foundation: Management and Operations [V4.0]

This three-day course includes instruction on the capabilities of VMware Cloud Foundation™ to manage and operate hybrid and cloud infrastructures, which includes customization and management. This course explains the architecture of VMware Cloud Foundation and explains licensing, certificates, VMware vSAN™, maintenance and multi-instancing. This course also covers workload domains, workload migration, availability and troubleshooting. In general, you will learn how to use and configure VMware Cloud Foundation 4.0.

Delivery Types	Classroom, Live Online, Onsite
Role	System Administrator, System Integrator, Consultant
Level	Professional
Length	3 Days

[Register now.](#)

NEW VMware Cloud Foundation: Plan and Deploy [V4.0]

This two-day course introduces the concepts and architecture of VMware Cloud Foundation™ to prepare you for a successful deployment. This course explains how to design and size your infrastructure for the management components and for workload domains in preparing for a VMware Cloud Foundation deployment. This course provides instruction on planning and designing the physical network, a key preparatory step for VMware Cloud Foundation. This course describes how to plan for, and execute, the VMware Cloud Foundation bring-up process. This course explains how to image VMware ESXi™ hosts for use in VMware Cloud Foundation using the VMware Imaging Appliance.

Delivery Types	Classroom, Live Online, vFlex-ILT, Onsite
Role	Solution Architect, System Integrator, Consultant
Level	Professional
Length	2 Days

[Register](#) now.

VMware Cloud Foundation: Management and Operations [V3.9.1]

This three-day course includes instruction on the capabilities of VMware Cloud Foundation™ to manage and operate hybrid cloud infrastructures, which includes customization and management. The course explains the architecture of VMware Cloud Foundation, and explains licensing, certificates, VMware vSAN™, maintenance and multi-instancing. The course also covers workload domains, workload migration, availability and troubleshooting.

Delivery Types	Classroom, Live Online, vFlex-ILT, Onsite
Role	System Administrator, System Integrator, Consultant
Level	Professional
Length	3 Days

[Register](#) now.

NEW VMware Cloud on AWS: Deploy and Manage 2020

This three-day course teaches you skills for deploying and managing a VMware Cloud™ on AWS infrastructure. Through a mix of lecture and labs, you will deploy and manage the VMware Cloud on AWS and VMware vSphere® features that build a foundation for a hybrid infrastructure. You will also discuss when and where these features have the greatest effect.

Delivery Types	Classroom, Live Online, vFlex-ILT, Onsite
Role	System Administrator, System Engineer, System Integrator
Level	Professional
Length	3 Days

VMware Integrated OpenStack: Install, Configure, Manage [V5]

This five-day, hands-on course gives you the skills to build a private cloud using VMware® Integrated OpenStack on the VMware-proven SDDC. This course builds your skills in installing, configuring, and managing VMware Integrated OpenStack through a combination of lecture and hands-on labs. You will learn how to offer IaaS and PaaS with advanced networking and security features to end users using VMware Integrated OpenStack.

Delivery Types	Classroom, Live Online, vFlex-ILT, Onsite

VMware PowerCLI for vSAN – On Demand

In this course, you learn to use VMware PowerCLI™ to automate major VMware vSAN™ tasks. You learn the basics of the VMware vSphere® Web Services API, which is the central interface through which all VMware automation tasks can be performed. You gain hands-on knowledge about installing and configuring PowerCLI, and learn the basic and advanced syntax. You also learn how to automate various tasks, such as reporting, health checks, configuration, maintenance and troubleshooting of a vSAN cluster by using PowerCLI cmdlets.

Delivery Types	Subscription
Role	Administrator
Level	Professional
Length	30 Days

Take the [On Demand](#) self-paced course.

NEW VMware vSphere: Optimize and Scale plus Troubleshooting Fast Track [V7]

This five-day, accelerated, hands-on training course is a blend of the VMware vSphere: Optimize and Scale and VMware vSphere: Troubleshooting courses. This Fast Track course includes topics from each of these advanced courses to equip experienced VMware administrators with the knowledge and skills to effectively optimize and troubleshoot VMware vSphere® at an expert level.

Delivery Types	Classroom, Live Online, vFlex-ILT, Onsite
Role	System Administrator, System Engineer, System Integrator
Level	Professional
Length	5 Days

[Register](#) now.

VMware vSphere: Troubleshooting [V7]

This five-day, hands-on training course provides you with the advanced knowledge, skills and abilities to achieve competence in troubleshooting the VMware vSphere® 7.x environment. This workshop increases your skill and competence in using the command-line interface, VMware vSphere Client™, log files and other tools to analyze and solve problems.

Delivery Types	Classroom, Live Online, vFlex-ILT, Onsite
Role	System Administrator, System Integrator
Level	Professional
Length	5 Days

[Register](#) now.

VMware vSphere: Fast Track [V7]

This five-day, intensive course takes you from introductory to advanced VMware vSphere® 7 management skills. Building on the installation and configuration content from our best-selling course, you will also develop advanced skills needed to manage and maintain a highly available and scalable virtual infrastructure. Through a mix of lecture and hands-on labs, you will install, configure and manage vSphere 7. You will explore the features that build a foundation for a truly scalable infrastructure, and discuss when and where these features have the greatest effect. This course prepares you to administer a vSphere infrastructure for an organization of any size using vSphere 7, which includes VMware ESXi™ 7 and VMware vCenter Server® 7.

Delivery Types	Classroom, Live Online, Onsite
Role	System Administrator, System Engineer
Level	Professional
Length	5 Days

[Register](#) now.

VMware vSphere: Design [V7]

This three-day training course equips you with the knowledge, skills and abilities to design a VMware vSphere® 7 virtual infrastructure. You follow a proven approach to design a virtualization solution that ensures availability, manageability, performance, recoverability and security, and that uses VMware best practices. This course discusses the benefits and risks of available design alternatives, and provides information to support making sound design decisions.

Delivery Types	Classroom, Live Online, vFlex-ILT, Onsite
Role	System Integrator, Consultant
Level	Professional
Length	3 Days

[Register](#) now.

VMware vSphere: What's New [V5.5 to V6.7]

In this three-day, hands-on training course, you will explore the new features and enhancements in VMware vCenter Server® 6.7 and VMware ESXi™ 6.7. Real-world use-case deployment scenarios, hands-on lab exercises and lectures will teach you the skills that you need to effectively implement and configure VMware vSphere® 6.7. This course is recommended for customers who want to deploy vSphere 6.7 into their existing vSphere environment.

Delivery Types	Classroom, Live Online, vFlex-ILT, Onsite

VMware vSphere: Optimize and Scale [V6.5]

This five-day course will teach you advanced skills for configuring and maintaining a highly available and scalable virtual infrastructure. Through a mix of lecture and hands-on labs, you will configure and optimize the VMware vSphere® features that build a foundation for a truly scalable infrastructure, and you will discuss when and where these features have the greatest effect. Anyone who is ready to take their understanding of vSphere to a deeper level and learn how to use advanced features and controls will greatly benefit from this course.

Delivery Types	Classroom, Live Online, vFlex-ILT, Onsite
Role	Administrator, Engineer

VMware vSphere: Install, Configure, Manage plus Optimize and Scale Fast Track [V6.5]

This intensive, extended-hours course takes you from introductory to advanced VMware vSphere® management skills. Building on the installation and configuration content from our best-selling course, you will also develop advanced skills needed to manage and maintain a highly available and scalable virtual infrastructure. Through a mix of lecture and hands-on labs, you will install, configure and optimize vSphere 6.5. You will explore the features that build a foundation for a truly scalable infrastructure, and discuss when and where these features have the greatest effect. This course prepares you to administer a vSphere infrastructure for an organization of any size using vSphere 6.5, which includes VMware ESXi™ 6.5 and VMware vCenter Server® 6.5.

Delivery Types	Classroom, Live Online, vFlex-ILT, Onsite
Role	Administrator, Engineer

VMware vSphere: Design Workshop [V6.5]

This three-day training course equips you with the knowledge, skills and abilities to design a VMware vSphere® 6.5 virtual infrastructure. You follow a proven approach to design a virtualization solution that ensures availability, manageability, performance, recoverability, and security, and that uses VMware best practices.

Delivery Types	Classroom, Live Online, vFlex-ILT, Onsite
Role	Architect, Engineer
Level	Professional
Length	3 Days
Related Certification	VMware Certified Advanced Professional 6.5 – Data Center Virtualization Design (VCAP6.5-DCV Design)

NEW VMware vRealize Automation: Advanced Features and Troubleshooting [V8.x]

This five-day course is a follow-on to the VMware vRealize® Automation™: Install, Configure, Manage course. In this course, you will go deeper into the advanced features of vRealize Automation to deploy user systems and interface vRealize Automation with other platforms. You will learn how to deploy an enterprise-level cluster environment using VMware vRealize® Suite Lifecycle Manager™. This course relies heavily on hands-on labs.

Delivery Types	Classroom, Live Online, vFlex-ILT, Onsite
Role	System Administrator, System Integrator
Level	Professional
Length	5 Days

[Register](#) now.

NEW VMware vRealize Automation: Orchestration and Extensibility [V8.1]

During this five-day course, you will focus on using VMware vRealize® Orchestrator™ to extend the functionality of VMware vRealize® Automation™. You will learn how to provide anything as a service (XaaS) and implement machine lifecycle extensibility using the vRealize Automation event broker. You will also learn how to create vRealize Orchestrator workflows. Features covered in this course include basic scripting implementation along with logic processing to implement a variety of functions to use in your environment. This course teaches implementing debugging, loops, conditions and user interactions in vRealize Orchestrator.

Delivery Types	Classroom, Live Online, vFlex-ILT, Onsite
Role	Administrator, System Integrator
Level	Professional
Length	5 Days

VMware vRealize Automation: Install, Configure, Manage [V7.6]

During this five-day course, you will focus on installing, configuring and managing VMware vRealize® Automation™. You will learn about the configuration and use of the vRealize Automation platform, including self-service provisioning and the creation of catalog services that include predefined virtual machines, software components and on-demand VMware NSX® networks. This course also covers interfacing vRealize Automation with other systems using VMware vRealize® Orchestrator™ to leverage workflows, creating approval cycles and managing machine lifecycles to conserve resources. In addition, you will better understand and know how to achieve the benefits of automation as a component of the software-defined data center.

Delivery Types	Classroom, Live Online, vFlex-ILT, Onsite
Role	Administrator, Engineer

VMware vRealize Operations: What’s New [V6.6 to V7] – On Demand

This course provides insight into the product enhancements made in the 7.0 version of VMware vRealize® Operations™. This course explains capacity concepts and improvements made to the capacity engine and workload optimization engine. This course covers assessment tools such as the VMware vSphere® Optimization Assessment and Upgrade Readiness Assessment. It also covers Management Packs such as SDDC Management Health solution, VMware vRealize® Operations Management Pack™ for Service Discovery, and VMware vRealize® Orchestrator™ and Federation. In general, this course explains how to use and configure the new features and enhancements in version 7.0, enabling you to get the most out of the product.

Virtual Cloud Network

Connect and secure apps and data, regardless of where they run, from data center to cloud to edge infrastructure.

Power your business with a network defined entirely in software. Built on best-in-class VMware technologies, a virtual cloud network connects and secures your apps and data across private, public and edge/branch clouds with a scale-out approach that's independent of the underlying physical infrastructure.

NEW VMware NSX-T Data Center: Install, Configure, Manage [V3.0]

This five-day, fast-paced course provides comprehensive training on how to install, configure and manage a VMware NSX-T™ Data Center environment. This course covers key NSX-T Data Center features and functionality offered in the NSX-T Data Center 3.0 release, including the overall infrastructure, logical switching, logical routing, networking and security services, micro-segmentation and firewalls, and more. Access to a software-defined data center environment is provided through hands-on labs to reinforce the skills and concepts presented in this course.

MAXIMIZE VALUE WITH PRIVATE VMWARE TRAINING

Private training is the perfect option for organizations that need a cost-effective way to train a large number of employees all at once. The cost per student is lower than the cost of a public class, you can tailor the content to your specific needs, and class is scheduled around your schedule, not ours. We also work with you to meet your schedule and location requirements, minimizing time away from work for your key staff.

NEW VMware NSX Advanced Load Balancer: Web Application Firewall Security

This three-day course provides comprehensive training on how to configure, maintain and troubleshoot the web application firewall component of the VMware NSX® Advanced Load Balancer™ solution, as well as provides an understanding of additional security-related functionality. This course covers key NSX Advanced Load Balancer web application firewall features and functionality offered in the NSX Advanced Load Balancer 18.2 release, including the overall infrastructure, virtual services and application components, as well as application troubleshooting and solution monitoring. Access to a software-defined data center environment is provided through hands-on labs to reinforce the skills and concepts presented in this course.

Delivery Types	Classroom, Live Online, vFlex-ILT, Onsite

Digital Workspace

Deliver a secure, consumer-like user experience on any device.

Enable a holistic change in the way end-user services are delivered by IT, so you can deliver the apps and data employees need to work across any device. By taking advantage of today's cloud-based management technologies, digital workspace solutions deliver self-service, out-of-the-box experiences that scale across platforms, locations and device ownership models.

VMware App Volumes and Dynamic Environment Manager

This three-day course builds your skills in application management using VMware App Volumes™ and VMware Dynamic Environment Manager™. You will learn how to use App Volumes to deliver applications and data to desktops and users in seconds and at scale. You will gain skills in managing application lifecycles from installation to update and replacement. You will also learn how to use Dynamic Environment Manager to provide personalization and dynamic policy configuration across virtual, physical and cloud-based environments to simplify end-user profile management.

VMware Horizon 7: Design Workshop [V7]

This three-day course presents a methodology for designing a VMware Horizon® solution. The design methodology includes recommendations for the type of information and data that must be gathered and analyzed to make sound design decisions for the client systems, the desktop options, the VMware vSphere® infrastructure and VMware Horizon components. VMware best practices are presented for each phase of the design process. In this course, you apply your new knowledge by working with other participants to design a VMware Horizon solution for a real-world project.

VMware Workspace ONE: Deploy and Manage [V20.x]

In this five-day course, you will configure and secure unified endpoint activation, registration and authentication. You will learn how to integrate industry-recognized enterprise technologies with VMware Workspace ONE®. Through a combination of hands-on labs, simulations and interactive lectures, you will learn how to configure and manage the endpoint lifecycle. The principles of enterprise mobility, unified endpoint and identity management are addressed throughout the course. You will leave the training empowered with the foundational skills and knowledge needed to effectively implement Workspace ONE.

Delivery Types	Classroom, Live Online, vFlex-ILT, Onsite

VMware Workspace ONE: Unified Endpoint Management Bootcamp [V20.x]

This five-day course is comprised of the three-day VMware Workspace ONE: Skills for Unified Endpoint Management course and the two-day VMware Workspace ONE: Unified Endpoint Management Troubleshooting course. You will configure and secure unified endpoint activation, registration and resource integrations, and learn how to integrate industry-recognized enterprise technologies with the VMware Workspace ONE® UEM (Unified Endpoint Management) console. Through a combination of hands-on labs, simulations and interactive lectures, you will also learn how to configure and manage the endpoint lifecycle. You will also learn to investigate, analyze and determine issues that might occur with all the different components of the Workspace ONE UEM platform. You will learn how to effectively troubleshoot product issues to enable administrators to understand how product services communicate and function—in turn, optimizing service and software health management.

Intrinsic Security

Learn how to leverage your infrastructure to protect apps and data from endpoint to cloud.

Leverage your infrastructure to provide adaptive protection for your apps and data, regardless of their location or movement. Seamlessly secure your data centers, clouds and endpoints, so your users have the flexibility and freedom to work as they wish.

NEW VMware Carbon Black App Control Administrator

This one-day course teaches you how to use the VMware Carbon Black® App Control™ product and leverage the capabilities to configure and maintain the system according to your organization's security posture and organizational policies. This course provides an in-depth, technical understanding of the Carbon Black App Control product through comprehensive coursework and hands-on, scenario-based labs.

Delivery Types	Classroom, Live Online, vFlex-ILT, Onsite
Role	System Administrator, Security Operations Personnel
Level	Professional
Length	1 Day
