

A Fast Path to Cloud

The pressure is mounting on IT leaders to accelerate the pace of moving applications to the cloud. Cloud provides resiliency and scale and a foundation for app modernization and digital transformation.

But you have to get there first before you can reap the benefits.

Over 50% of enterprises will use industry cloud platforms by 2028 to accelerate their business initiatives.

- Gartner, Nov 2023

Cloud migration challenges

Infrastructure incompatibilities

Cost and time to refactor apps

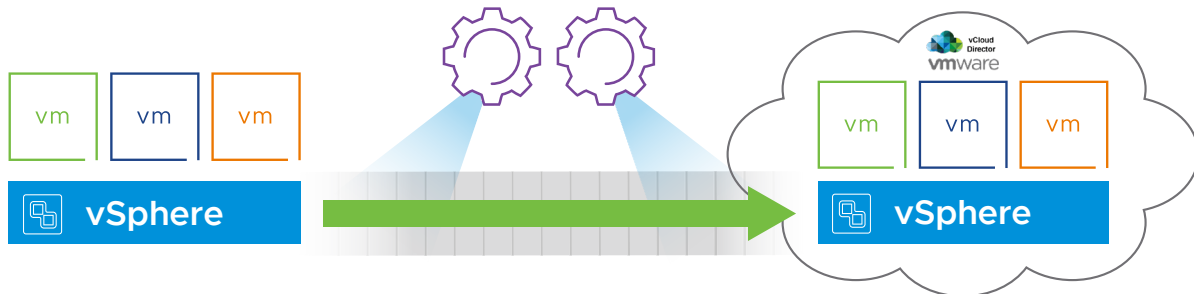

Inflexible target networks and security architectures

Unexpected performance issues

Many cloud solutions require significant investment of time, money, and IT resources to ensure applications are compatible across environments. Instead, organizations would benefit from a single, consistent infrastructure across a seamless hybrid environment.

VMware by Broadcom partners Migration as a Service provides an easy onramp to cloud. Leveraging migration technology designed specifically for VMware environments, you can migrate workloads and applications to our cloud without a hitch.

With VMware by Broadcom partners, migrations are:

Easy

Seamless compatibility with zero workload changes required

Self-serve

Migrate at your pace, without hassle

Flexible

Cold and warm migration options to minimize disruption

Customizable

Controls to manage target networking and support complex apps

VMware by Broadcom partners also offers assistance for your onboarding with workload assessments, cloud readiness assessments, streamlined cloud migration services, and more.

Take the onramp to cloud

It's easy to start migrating applications to our cloud. To get started, find a cloud service provider here:
