

# VMware Cloud Foundation

## Learning Path

### Level 100 - Beginner

#### [Cloud Foundation Overview](#)

Discover the power of VMware Cloud Foundation. Get started with documentation and videos to learn about VCF and its components. Leave with a high-level understanding of the solution.

#### [Cloud Foundation Data Sheet](#)

Accelerate business outcomes with VCF. This datasheet describes VCF and its key use cases. Quickly learn about the components that make up VCF and the broad use cases it addresses.

#### [TCO Whitepaper](#)

Harness the power of consistent operations and automation to maximize your infrastructure. In this brief whitepaper, you will find out how to save up to 51% compared to traditional infrastructure with VCF.

#### [Total Economic Impact Study](#)

This Forester study shows how actual customers reduced operational costs and increased agility using VCF. Learn about the total economic impact of VCF and how it can unlock your teams potential.

### Level 200 – Intermediate

#### [Hands on labs](#)

Free, self-paced, online environments with guided exercises allow customers to experience VCF. These time-limited labs are ideal for any practicing administrator who wants to test drive VCF and familiarize themselves with the product firsthand.

Overview of VCF	<a href="#">HOL-2446-05-HCI</a>
SDDC Manager Operations	<a href="#">HOL-2446-01-HCI</a>
Software Defined Networking	<a href="#">HOL-2446-02-HCI</a>
VMware Tanzu	<a href="#">HOL-2446-04-HCI</a>

#### [VMware TechZone](#)

Deep dive into any particular aspect of VCF. This one-stop technical repository contains all the detailed technical documentation, demos, and click-through simulations to answer any questions. A key resource for any practicing administrator.
