

Harness the power of AI with VCF Private AI Services

Over the next decade, AI will massively transform business. Enterprises are already beginning to leverage this technology to boost productivity across every aspect of their organizations.

\$22.3 Trillion

global impact from AI solutions and services¹

95% of organizations

are integrating AI features into new apps²

But what about privacy?

While the potential of AI is virtually limitless, it also presents inherent privacy risks.

60%

of IT leaders believe **“AI presents new risks to our data privacy that we don’t know how to address.”**²

50%

of IT leaders **“don’t yet have a plan to prevent data leakage around sensitive material and content using generative AI.”**²

Privacy and security with VCF Private AI Services

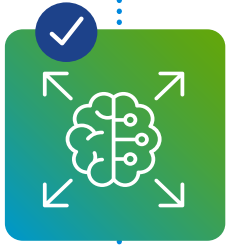

VCF Private AI Services provide the architectural approach that enables you to unlock the tremendous business potential of AI while maintaining privacy and control of your data.

Get the flexibility of choice.

Customize your AI journey with a wide choice of LLMs and partners from VMware’s open ecosystem.

Deploy AI projects with confidence.

Protect the privacy of your corporate data and IP and maintain access control by using AI solutions optimized to run on VMware Cloud Foundation.

Achieve great performance.

Get excellent performance on NVIDIA and AMD GPUs, or Intel CPUs and GPUs. Optimize workload balance with vSphere Distributed Resource Scheduler.

Optimize costs and compliance.

Leverage our expertise and partnerships to build a cost-effective solution while complying with industry-specific regulations.

Scale without compromise.

Enable complex AI models with up to 8 NVIDIA vGPUs per VM and speed up model training time with support for up to 32 passthrough devices per VM.

Augment productivity.

Build private chatbots that generate intelligent outputs. Create action recommendation engines and automate repetitive manual processes.

Ready to start your AI journey?
