VMware Cloud Foundation License Portability – List of Certified Cloud Providers

This page is the official list of Broadcom certified cloud service providers (VCSP or MaaS partners) offering integrated VCF offerings eligible for License Portability (BYOL or BYOS) of VCF and applicable Add-ons*. For integrated VCF offerings, reach out to your cloud service provider partner to verify region availability, and for more information please contact your local salesperson.

NOTE: This list is not exhaustive for License Portability endpoint destinations and for non-VCSP or MaaS partners providing infrastructure-as-a-service offerings compatible with License Portability not listed on this page, refer to the Broadcom Compatibility Guide to verify that the underlying infrastructure of the endpoint is technically capable of running VCF.
