Keeping your VMware Cloud Foundation® (VCF) environment current is essential for taking advantage of new features, benefiting from security enhancements and maintaining compliance. Often managing day-to-day demands and competing projects delay needed upgrades which can put your environment at risk. And your team may not have the skills and experience to upgrade your environment successfully. Our VMware Pro Cloud Service™ for Upgrade can help.

Service Overview

VCF Professional Services can help you prepare and upgrade your existing VMware Cloud Foundation and VMware vSphere® environments. Our experts use best practices and their extensive experience working with other customers for worry-free upgrades. Service activities include:

- Assess environment readiness
- Provide technical consultation and assist with readiness preparation
- Assist with clean-up and remediation
- Upgrade an existing VMware Cloud Foundation environment
- Upgrade an existing vSphere environment
- Convert an existing vSphere instance into a new VCF instance
- Import an existing vSphere instance into an existing VCF instance
- Validate the upgrade/converge
- Conduct a knowledge transfer

Benefits

VCF Professional Services can help you get your VMware Cloud Foundation and vSphere environments current and keep them current. Using a process refined through thousands of deployments, we handle the upgrade details to reduce risk and minimize downtime. This allows your team to stay focused on your core business projects instead of maintenance.
