

Updated RPMs and Security Fixes

ESX Server 3.5 Update 1

Revised: 10 APR 2008

This release contains an update to the Service Console kernel and Service Console RPMs. The ESX Server 3.5 Service Console was based on RHEL 3.0 Update 8 plus security fixes. ESX Server 3.5 Update 1 is also based on RHEL 3.0 Update 8 plus security fixes.

ESX Server 3.5 Update 1 contains the latest security updates based on the RHEL 3.0 Update 8 distribution.

The following sections list those contents and the security alerts that are addressed:

- [RPMs Updated](#)
- [Service Console Kernel \(vmnix\) Update](#)

RPMs Updated

The following Service Console RPMs are updated in ESX Server 3.5 Update 1. They originate from RHEL 3.0 Update 8. A few RPMs have been patched by Red Hat after the release of RHEL 3.0 Update 8. Those security patched RPMs have been included in this distribution.

Be sure to test any customizations you make to these RPMs or scripts that run in the service console after the upgrade.
