

Updated RPMs and Security Fixes

ESX 4.0 Update 2

This release contains an update to the VMware RPMs, the Service Console RPMs, and the Service Console kernel. The ESX 4.0 Service Console is based on VMware source code and the following Linux kernel: kernel-400.2.6.18-164.2.17.261974.x86_64.

ESX 4.0 Update 2 contains the following:

- The latest security fixes of the Linux distribution
- Feature updates and critical bug fixes of the VMware code base

RPMs Updated

The following Service Console RPMs are updated in ESX 4.0 Update 2. Those security patched RPMs have been included in this distribution.

Be sure to test any customizations you make to these RPMs or scripts that run in the service console after the upgrade.

NOTE For RPMs modified by VMware, the build number of the RPM is part of the RPM filename. For third party modules and code libraries, the version number provided by the third party is part of the filename.

The RPMs listed in this section are the latest versions of all RPMs that have been modified since ESX 4.0 became generally available. The list of modified RPMs is as follows:

Service Console RPMs
