

# Key Management Server (KMS)

Last Updated: February 21, 2024

[For more information go to vmware.com.](https://www.vmware.com)

## What's New

Changes made in the last 7 days include:

Partner Name	KMS Name	KMS Version	KMIP Version	Supported vSphere Releases	Download & Details Link
Entrust	Entrust KeyControl	10.2	1.1,1.2,1.3,1.4	ESXi 3.0 U1, vSphere 8.0	<a href="#">Link</a>

## Introduction

This document lists Key Management Servers, also referred to as KMS, developed and released by Security and Cloud vendors for encryption in virtualized environments. The KMS listed below passed VMware's KMS Certification tests, which allows these certified KMS to provide a measure of reliability and stability of the end solution in customer deployments. All the tests contained in KMS Certification plugin are meant to verify that the vendor's KMIP compliant KMS works with vSphere VM Encryption feature. Testing consists of verifying correct behavior of a KMS and it does not introduce undesirable effects on the operation of the system as a whole. This document lists certified KMS starting with vSphere 6.5.

Any technical issues found with the vendor KMS are handled by the corresponding vendor as described in the [3rd party support documentation](#) . See also the links to vendor support websites.
