Introduction

Turnkey Appliances (Rapid Desktop Appliances) with pre-integrated, pre-configured, pre-tested, and validated software, storage and compute components offer a one-stop shop for Horizon deployment. These help customers:

- 1) Save money and minimize risk with an all-in-one solution.
- 2) Simplify deployment with converged infrastructure that works together out of the box.
- 3) Scale by simply adding additional load-balanced appliances.

It is a requirement that the relevant components of each certified solution are also ESX certified and listed on the appropriate [VMware Compatibility Guide](#) .

For detailed information regarding the individual View Appliances and solutions, please go to https://solutionexchange.vmware.com/store/category_groups/end-user-computing/fast_track_turnkey
