Footnotes:

- 1 . The device PID string (model) is truncated in ESXi. Please use both model number and firmware version when trying to identify the device. When in doubt, please consult with the hardware provider.
- 2 . vSAN does not support the TCG command set used with SED drives. SED drives may be used normally in the vSAN environment without TCG
- 3 . Customer will follow the vSAN performance sizing best practices to properly design the solution.
- 4 . Encryption key management is not supported therefore TCG should not be configured on this drive in the vSAN environment.
- 5 . The drive does not meet vSAN random write endurance requirements. In a write intensive vSAN environment, the drive may wear out sooner than expected. User should collect more information about the drive and planned workload to determine whether the drive is suitable for deployment.
- 6 . Customer should follow the vSAN performance sizing best practices to properly design the solution.
- 7 . The drive does not meet vSAN random write endurance requirements. In a write intensive vSAN environment, the drive may wear out in less than 5 years. User should collect more information about the drive and planned workload to determine whether the drive is suitable for the deployment.
- 8 . vSAN: Customer will follow the vSAN performance sizing best practices to properly design the solution.
- 9 . The drive cannot be used as the boot drive in the vSAN environment because it does not meet boot device write endurance requirement.
- 10 . Driver 4.2.1 is used in this certification
- 11 . Upon installing intel NVMe driver ver. 1.2.0.8, a server reboot is required for some fixes to take effect. This issue has been resolved in driver versions starting 1.2.0.9
- 12 . Hot-Plug certification testing was not performed for this drive
- 13 . Hot plug feature is not supported on this drive.
- 14 . Hot unplug of the drive while the system is running will lead to data loss. Usage of this drive is only allowed if user will not hot-unplug the drive while the system is running.
- 15 . Hot plug has not been tested for this driver and firmware combination
