## Introduction

View Manager (formally known as VMware Virtual Desktop Manager) is tested for compatibility with major client device manufacturers. VMware will support a variety of thin client devices with standard options as they come to market.

Client Type Definitions:

\* VMware - This client type is a device which utilizes the View software and includes functionality as described in the Administration Guide for View Manager: [http://www.vmware.com/support/pubs/view\\_pubs.html](http://www.vmware.com/support/pubs/view_pubs.html)

\* Vendor - This client type is a device developed by specific vendors. This client meets the minimum requirements VMware has set for certification, however specific features of these clients may vary between different vendors and devices.

## Thin Client Device and Model Information

The detailed lists show actual vendor products that are tested by VMware or VMware partners. VMware provides support only for the products that are listed in this Compatibility Guide.
